Appendix A: Public Notice and Summary of Comments	308

Overview

The Missouri Department of Social Services (DSS) is the single state agency federally designated to oversee the Missouri Medicaid program. The MO HealthNet Division (MHD) within DSS is in charge of administering and managing the Missouri Medicaid program.

The State of Missouri has approximately 6,126,452 citizens.¹ Four Percent of the total population is enrolled in the State's Medicaid Fee-For-Service (FFS) program.

In accordance with Federal rules at 42 C.F.R. §§447.203-204 (the Access Rule), the MHD developed an Access and Monitoring Review Plan (AMRP) in 2016, which was published by the Centers for Medicare and Medicaid Services (CMS) on February 10, 2017. The AMRP, set forth a transparent, data driven procedural process to demonstrate that the State's Medicaid FFS payments complied with the access standards in Section 1902(a)(30)(A) of the Social Security Act. As required in the Access Rule, Missouri developed a revised AMRP designed to monitor access. Among other requirements in the Access Rule, states are required to develop an AMRP to review participant access to certain Medicaid services.² The Access Rule applies to FFS payments and does not apply to the Managed Care Organization payments to providers.

The MHD has developed this AMRP for the following services under the FFS program:

1. Primary care services, including those provided by a physician in Federal Qualified Health Clinics (FQHC), Rural Health Clinics (RHC), clinic, or dental care;
2. Physician specialist services, including cardiology, neurology, ophthalmology, urology and nephrology, and radiology;
3. Behavioral health services, including mental health and substance use disorder;
4. Prenatal and postnatal obstetric services, including labor and delivery; and
5. Home health Services and Private Duty Nursing.

The MHD added three additional categories due to restructuring of rates which had the potential to affect access to care at the time they were implemented:

6. Pharmacy agencies,
7. Nursing facilities, and
8. Outpatient Hospital.

The AMRP presents information and data used to measure access to care for the required services:

- The FFS population data;
- FFS program descriptions;
- Rate History
- Performance and demographic summary reports;
- State Fiscal Year (SFY) Rate Study;
- The availability of MO HealthNet (FFS Medicaid enrolled) providers;
- FFS network adequacy access reports; and
- Utilization of FFS services required in the AMRP.

¹ https://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=PEP_2018_PEPANNRES&src=pt

² 42 C.F.R. 447.203(b)

The MHD compiled this AMRP to report on the existing FFS access to care and service payment rates based on existing or currently available information. Consistent with CMS guidance, the MHD will continue to develop more sophisticated analysis over time to review and monitor adequacy, including:

- the extent to which beneficiary needs are fully met;
- the availability of care through enrolled providers to beneficiaries in each geographic area, by provider type and site of service;
- changes in beneficiary utilization of covered services in each geographic area; and
- the characteristics of the beneficiary population.

The MHD does not collect reimbursement rates from private health insurance companies. While the Missouri Department of Insurance is responsible for regulating private insurance companies doing business in Missouri, there is not a law requiring private health plans to report or publish their provider reimbursement rates. The MHD does not currently have a resource for private-payer rate data. The MHD has compared Medicaid rates to specific Medicare rates when applicable.

The AMRP is published for public comment on the MHD website under Alerts and Notifications at www.dss.mo.gov/mhd. The MHD developed other avenues to submit public comments electronically, by regular, express or overnight mail, or in person. The MHD also maintains a webpage for on-going public comments at <https://dss.mo.gov/mhd/amrp.htm>. Information gathered is utilized for future improvements to access to care.

NOTE: In the MO HealthNet FFS program, behavioral health services are appropriated, in part, via the physician-related program line, therefore, the reporting of behavioral health and physician's service rate reimbursement is sometimes blended. The MHD continues to work towards refining existing reporting tools to the extent possible, to more clearly separate and isolate behavioral health service costs, rates, and network impact consistent with the requirements in the Access Rule.

MO HealthNet Medicaid Program and Population

The MHD utilizes multiple delivery and reimbursement models, including traditional FFS and Health Maintenance Organization (HMO)-styled Managed Care. To determine which program a participant takes part in depends on a number of factors, including the participant's eligibility group and the services needed.

The MHD's HMO-style Managed Care program is known as MO HealthNet Managed Care. On May 1, 2017, the MO HealthNet Managed Care program expanded statewide to include all 114 counties and the City of St. Louis. Statewide participation in MO HealthNet Managed Care is mandatory for the following MO HealthNet eligibility groups:

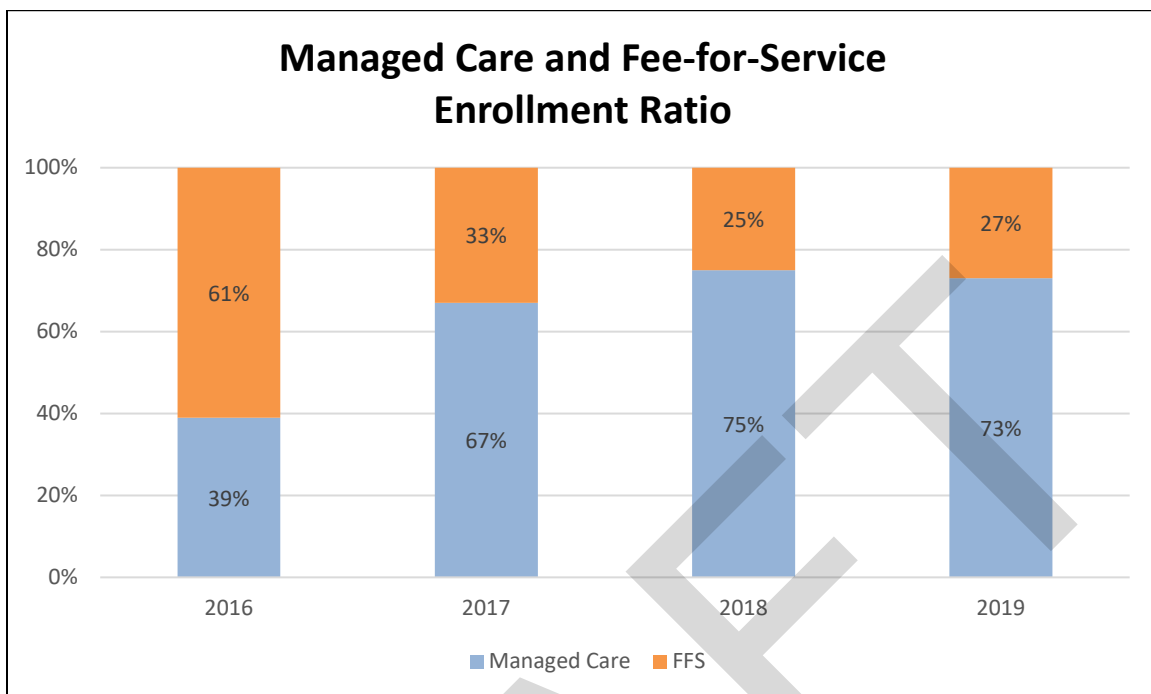

- MO HealthNet for Families - Adults and Children;
- MO HealthNet for Children;
- Refugees;
- MO HealthNet for Pregnant Women;
- Children's Health Insurance Program (CHIP);
- Children in state care and custody; and
- Show Me Healthy Babies Program (SMHB)

In 2017, approximately 240,000 participants, who previously were enrolled in the MO HealthNet FFS program, were transitioned to a Managed Care health plan. These new Managed Care participants joined about 500,000 existing Managed Care participants, amounting to an estimated 748,435 Missourians in the Managed Care program.

Managed Care and Fee-for-Service Enrollment History			
	Managed Care	Fee-for-Service	Total
2016	465,587	722,040	1,187,627
September 2017	748,435	367,549	1,115,984
February 2018	715,812	240,414	956,226
May 2019	633,056	236,573	869,629

In MO HealthNet Managed Care, enrollees receive the majority of their services through the managed care benefit. Services provided on a FFS basis outside of the capitation payment, include pharmacy services, transplants, school-based therapy, Department of Health and Senior Services (DHSS) newborn screening services, certain mental health services, including Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID), community psychiatric rehabilitation services, CSTAR services, smoking cessation, and mental health services for children in the care and custody of the state.

For Missouri's Medicaid population outside of Managed Care, the MHD pays for qualified medical costs and services for eligible beneficiaries based on income, assets, and resources. In 2016, the FFS population comprised 61% of the total Medicaid population and the Managed Care population comprised 39% of the total Medicaid population. In 2017, the state-wide managed care expansion shifted the majority of the population, once served in the FFS program, to the Managed Care program. Currently, the majority of the Medicaid population receives services in the Managed Care program. Eligibility changes on a daily basis due to enrollment and coverage updates; however, the enrollment ratio (Managed Care vs. FFS) has remained consistent since 2018.

This AMRP focuses on the 27% of the FFS population identified in May 2019, and if applicable, any carved out of Managed Care services required of the AMRP.

The MHD FFS program covers the following eligibility categories:

- Aged, blind, and disabled
- Qualified Medicare Beneficiaries (QMB)
- Children in a Nursing Facility/ICF/IID
- Children placed in foster homes or residential care by the Department of Mental Health (DMH)
- Missouri Children with Developmental Disabilities (Sarah Jean Lopez) Waiver
- Temporary Assistance for pregnant women and Presumptive eligibility for children
- Women with Breast or Cervical Cancer Treatment
- Children in residential care
- Uninsured women
- Women's Health Services
- Persons with MORx only

NOTE: There are opt-out guidelines in which a participant may qualify to be in the FFS program for the following Managed Care eligibility categories:

- MO HealthNet for Families - Adults and Children
- MO HealthNet for Children
- Refugees
- MO HealthNet for Pregnant Women
- Children's Health Insurance Program (CHIP)
- Children in state care and custody
- Show Me Healthy Babies Program (SMHB)

MO HealthNet Total Population - Participants by Age and Gender Category

The FFS population primarily consists of adult females in Missouri. Prior to the Managed Care program going state-wide in 2017, a large portion of the 0-21 age group could be found in the FFS program.

FFS Population by Age		
	Age 0-21	Age 21+
2016	65%	35%
2017	2%	98%
2018	2%	98%
2019	2%	98%

FFS Population by Gender		
	Males	Females
2016	45%	55%
2017	33%	67%
2018	42%	58%
2019	43%	58%

Full Comprehensive Packages

Adults in Medicaid Eligibility (ME) categories that pertain to persons who are in the Aid to the Blind or Pregnant Women programs receive a full comprehensive benefit package, including primary, acute and preventive care, hospital care, dental, prescriptions, and vision services. All other adults receive a limited benefit package of services depending on their ME category of assistance.

MO HealthNet for Kids refers to the statewide program for children in low-income families, uninsured children through Children's Health Insurance Program (CHIP), and children in the custody of the state. Children receive a full comprehensive package, including primary, acute and preventive care, hospital care, dental, prescriptions, and vision services, and receive their care through the Managed Care delivery system, unless they have opted out of Managed Care.

FFS Participants in Full Comprehensive Packages by Category			
	2017	2018	2019
Aid to the Blind	62%	81%	51%
MO Children with Developmental Disabilities	18%	9%	14%
Presumptive Eligibility	20%	10%	35%
MO HealthNet for Kids in Vendor Institution	0%	0%	0%

Children's Health Insurance Program (CHIP) Premium Group

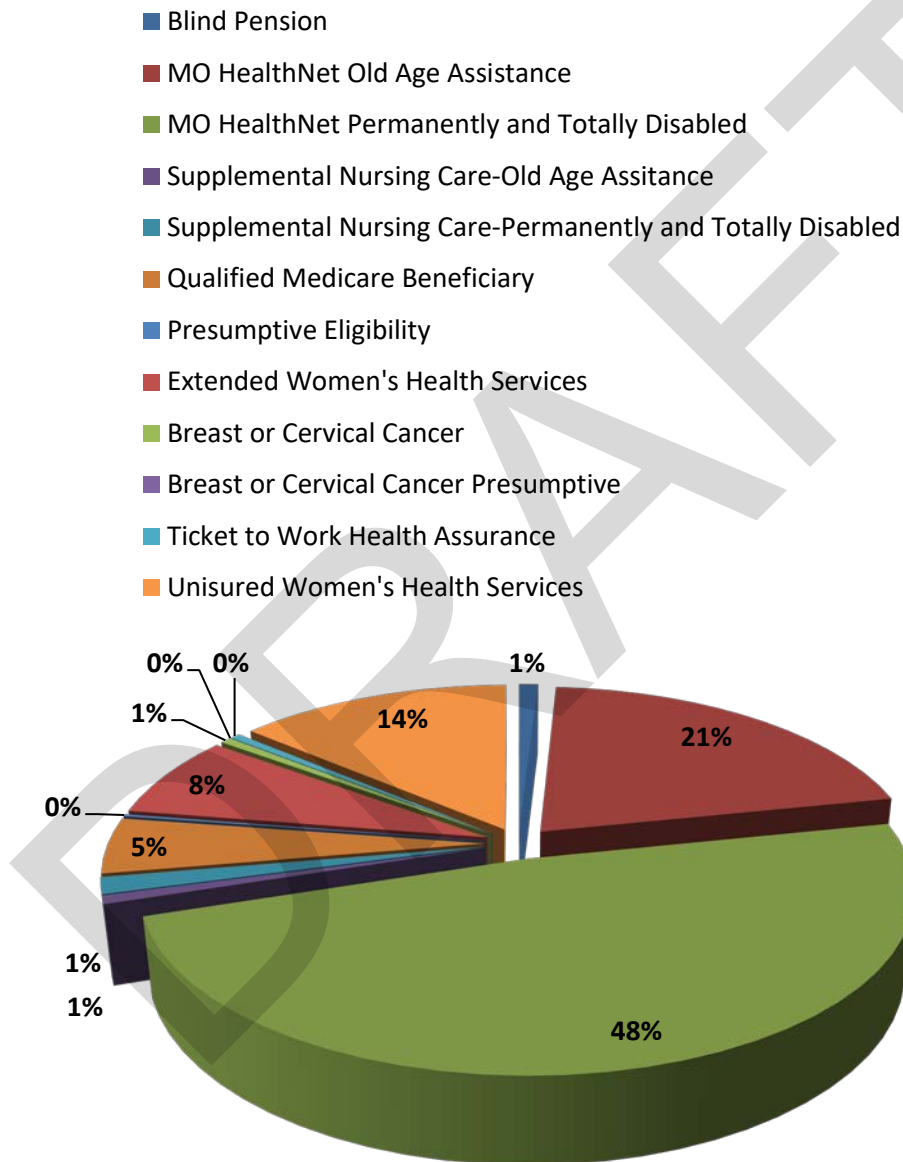

CHIP provides health insurance for uninsured children under the age of 19 who have a family income between 150% and 300% poverty and have no access to affordable health insurance. These children have the full comprehensive package, except for non-emergency medical transportation.

Non-Emergency Medical Transportation (NEMT)

MO HealthNet participants in certain categories of assistance receive NEMT. The NEMT Program provides for transportation and ancillary services by a transportation broker. The broker may provide NEMT services either through direct service by the broker and/or through subcontracts between the broker and subcontractor(s).

The purpose of the NEMT Program is to assure transportation to MO HealthNet participants who do *not* have access to free appropriate transportation to and from scheduled MO HealthNet covered services. The NEMT program is a covered benefit assisting eligible FFS participants with transportation to MO HealthNet covered services.

The NEMT program delivers additional assistance in providing participants access to covered services. The NEMT program is not used for emergency medical transportation. The program is designed for scheduled covered MO HealthNet services. The program is available to the following MO HealthNet categories of assistance:

- Blind Programs (excluding ME Code 02)
- Breast and Cervical Cancer Control Project (BCCCP)
- CHIP Kids (excluding ME codes 71 and 72 only)
- MO HealthNet for Adults
- MO HealthNet for Children
- MO HealthNet for Kids (excluding ME Codes 08, 64, 65)
- MO HealthNet for Pregnant Woman
- Presumptive Eligibility for Children
- Temporary Assistance for Pregnant Women (excluding ME Code 59)

In 2019, 217,016 of the 234,146 FFS population qualified for NEMT services, which is 93% of the total FFS population. This program provides additional access to services.

FFS Physician Related Programs

The goal of the Physician-Related Program, including primary care and physician specialist services, is to provide access to proper health care in the appropriate setting and to improve the general health and well-being of MO HealthNet participants.

The Physician-Related Program funds physician-related services provided to FFS MO HealthNet participants. Services are provided by physicians, advanced practitioners, nurses/technicians, and certain behavioral health providers at various locations.

Physician-Related Program			
Fiscal Year	Percent of Total Medicaid Program	Number of Providers	Percent Paid to Clinics, RHCs, and FQHCs
2016	8.79%	39,428	65%
2017	6.55%	42,776	87%
2018	6.38%	43,941	77%

Comparisons between 2016 and 2018 enrollment data, shows an 11% increase in the total of physician-related providers.

Physician-related services include diagnostic, therapeutic, rehabilitative, or palliative care, lab and x-ray, family planning, and behavioral health.

The following physician-related services are limited to certain MO HealthNet participants:

- Early Periodic Screening Diagnosis and Treatment (EPSDT);
- Health Home coordination for individuals with chronic conditions;
- Asthma education and in-home environmental assessments; and
- Applied Behavioral Analysis (ABA)

Early Periodic Screening Diagnosis Treatment (EPSDT)

The EPSDT program, or Healthy Children and Youth (HCY) program, provides primary and preventative services to MO HealthNet participants who are infants, children, and youth under the age of 21 years. To ensure a child's health, a primary care provider is designated to manage a coordinated, comprehensive, continuous health care program to address the child's primary health care needs. Full, partial, and inter-periodic health screenings; medical and dental examinations; immunizations; and any medically necessary treatment to correct or improve defects and chronic conditions found during the screening are considered EPSDT benefits.

Health Homes

Section 2703 of the Affordable Care Act (ACA) gives MO HealthNet the option to pay providers to coordinate care through a "health home" for individuals with chronic conditions. A team of health care professionals acting as a health home may include physicians and other professionals, such as a nurse, care manager, care coordinator, behavioral health consultant, nutritionist, or social worker. A health home may be a freestanding practice or a practice based at a hospital or other facility. Health home services include comprehensive care management, care coordination and health promotion, comprehensive transitional care from inpatient to other settings, patient and family support, and referral to community and social support services. Health homes are required to use "health information technology" to link services.

Eligible individuals have at least two of the following diagnoses:

- Asthma
- Cardiovascular disease
- Diabetes
- Developmental disabilities
- Overweight (BMI>25)-OR
- One of the above and tobacco use
- Diabetes as single condition.

The MHD, in coordination with the DMH, currently operates two health home programs:

1. Primary Care Health Home for participants diagnosed with two chronic conditions or diagnosed with one chronic condition and at-risk for development of a second.
2. Community Mental Health Center (CMHC) Health Home for participants with a serious and persistent mental illness, serious emotional disorder, or substance use disorder.

Clinical care management per member per month (PMPM) payments are made for the reimbursement of required contracted services and the cost of staff primarily responsible for delivery of these specified

health home services that are not covered by other MO HealthNet reimbursement methodologies.

Asthma Educators and In-home Environmental Assessors

Pediatric MO HealthNet participants with a primary diagnosis of asthma, who meet specific criteria indicating uncontrolled asthma, may receive up to two asthma education services and two in-home environmental assessments per year.

For participants to be eligible for asthma education and asthma environmental assessment services the individual must meet the following criteria:

- Be currently enrolled in MO HealthNet
- Be younger than 21 years of age
- Have a primary diagnosis of asthma
- Have had one of the following events as a result of asthma in the last 12 months:
 - 1 or more Inpatient Hospital stays
 - 2 or more Emergency Department (ED) visits
 - 3 or more Urgent Care visits
 - A high utilization of rescue inhalers (short-acting inhaled beta-2 agonists) defined as 4 or more prescription refills, or underutilization of ICS (inhaled corticosteroids) defined as missing 4 or more refills based on their enrollment months, and at least one ED or Urgent Care visit.

Applied Behavior Analysis (ABA)

ABA services are covered for individuals under age 21 who have a diagnosis of Autism Spectrum Disorder. ABA services are provided by licensed behavior analysts, ABA qualified licensed psychologists, and licensed assistant behavior analysts. All ABA services require precertification.

All categories of assistance can qualify for ABA services, except the Uninsured Women's Services, Temporary Women's Assistance for Pregnant Women, and Missouri RX Plan. However, the covered benefit is limited to participants under the age of 21 and must have an Autism Spectrum disorder diagnosis to qualify.

MO HealthNet Physician-Related Provider Types

The MO HealthNet FFS program utilizes a number of different physician-related provider types in its program, including:

- Advanced Practice Registered Nurses (APRN) or Nurse Practitioners (NP)
- Advanced Practitioners
- Assistant Physicians (AP) once licensed by the Board of Healing Arts
- Behavioral health providers:
 - Psychiatrists
 - Psychologists, including provisional licensees
 - Licensed professional counselors (LPC), including provisional licensees
 - Licensed clinical social workers (LCSW), including provisional licensees

- Certified Registered Nurse Anesthetists (CRNA) and Anesthesiologists Assistants (AA)
- Licensed behavior analysts
- Nurse Midwives
- Physician Assistants (PA)
- Physicians
- Podiatrists.

Services may be billed by physicians, certain advanced practitioners, behavioral health providers, or on behalf of professional services provided at the following locations:

- Ambulatory surgical centers (ASC)
- Clinics
- Federally qualified health centers (FQHC)
- Hospital (inpatient and outpatient settings)
- Independent diagnostic testing facilities
- Lab and x-ray facilities
- Nursing facilities
- Participant's home
- Rural health clinics (RHC)

Physicians

Physicians, including medical doctors and doctors of osteopathy, enrolled in the MO HealthNet program are identified by the specialty of medicine they practice. Specialties include allergy immunology, anesthesiology, cardiology, dermatology, emergency medicine, family practice, general practice, general surgery, internal medicine, laryngology, nuclear medicine, neurological surgery, obstetrics/gynecology, ophthalmology, otology, otolaryngology, orthopedic surgery, pathology, pediatrics, physical medicine and rehabilitation, plastic surgery, preventive medicine, proctology, psychiatry, neurology, radiation therapy, radiology, rectal and colon surgery, rehabilitative medicine, rhinology, thoracic surgery, and urology.

Podiatrists

Podiatrists provide medical, surgical, and mechanical services for the foot or any area not above the ankle joint. However, the following podiatry services are not covered for adults (except pregnant women, the blind, or nursing facility residents): trimming of non-dystrophic nails; debridement of one to five nails by any method; debridement of six or more nails by any method; partial or complete excision of the nail and nail matrix; and strapping of the ankle and/or foot.

Advanced Practice Registered Nurses and Nurse Practitioners (APRN)

An APRN or nurse practitioner (NP) is one who has education beyond the basic nursing education and is certified by a nationally recognized professional organization as having a nursing specialty, or who meets criteria for advanced practice nurses established by the Missouri Board of Nursing. Numerous specialties are recognized such as family, gerontology, clinical, obstetrics/GYN, neonatal, mental health, and certified registered nurse anesthetists. APRNs and NPs must enter into a collaborative practice

agreement with a physician. Such a collaborative practice agreement may authorize APRNs and NPs to prescribe certain medications. APRNs and NPs are generally employed by physicians, but are not required to be employed by physicians.

Nurse Midwives

Nurse midwife services are those services related to the management and provision of care to a pregnant woman and her unborn/newborn infant by a certified nurse midwife. These services may be provided throughout the maternity cycle, which includes pregnancy, labor and delivery, and the initial postpartum period not to exceed six weeks. Covered services include antepartum care, delivery, postpartum care, newborn care, office visits, laboratory services and other services within the scope of practice of a nurse midwife. Nurse midwives may also provide care outside of the maternity cycle such as family planning, counseling, birth control techniques, and well-woman gynecological care, including routine pap smears and breast examinations (Section 13605, OBRA 93). Nurse midwife services may also include services to the newborn, age 0 through 2 months, and any other MO HealthNet eligible female, age 15 and over.

Certified Registered Nurse Anesthetists and Anesthesiologist Assistants (CRNA)

A CRNA introduces and manages substances into the body by external or internal means that cause a loss of sensation with or without loss of consciousness. To serve MO HealthNet participants, a CRNA must hold a valid current license as an APRN or NP in the state of Missouri and be currently certified by the Council on Certification of Nurse Anesthetists.

An Anesthesiologist Assistant (AA) works under the supervision of a licensed anesthesiologist and provides anesthesia services and related care. An AA can only practice under the direct supervision of an anesthesiologist who is physically present or immediately available and must be licensed by the Missouri Board of Healing Arts. A supervising anesthesiologist shall be allowed to supervise up to four AAs concurrently, consistent with 42 CFR 415.110. An AA and a CRNA are not allowed to bill for the same anesthesia service.

Behavioral Health Providers

MO HealthNet provides various behavioral health services, including psychiatric diagnostic evaluations, individual psychotherapy, group psychotherapy, family psychotherapy, psychological testing, smoking behavioral change, Health and Behavior Assessment and Intervention, and crisis psychotherapy. The following providers are authorized to serve MO HealthNet eligible children and adults:

- Psychiatrists
- Licensed Psychologists (including provisional licensees)
- Licensed Clinical Social Workers (including provisional licensees)
- Licensed professional counselors (including provisional licensees)
- Licensed Marital and Family Therapists (including provisional licensees).

Clinic

Clinics offer preventive, diagnostic, therapeutic, rehabilitative or palliative services that are furnished by a facility that are not part of a hospital but are organized and operated to provide medical care to outpatients. Services furnished to outpatients include those furnished at the clinic by, or under the direction of, a physician and those services furnished outside the clinic by clinic personnel under the direction of a physician.

Laboratory and X-Ray

Laboratory, radiology, and x-ray facilities provide examination and radiology services under the physician program. Laboratories perform examinations of body fluids, tissues or organs by the use of various methods employing specialized equipment, such as electron microscopes and radio-immunoassay. A clinical laboratory is a laboratory where microbiological, serological, chemical, hematological, radio bioassay, cytological, immunohematological, or pathological examinations are performed on material derived from the human body to provide information for the diagnosis, prevention or treatment of a disease or assessment of a medical condition. Operations of a laboratory are generally directed by a pathologist.

X-ray facilities offer radiological services in which x-rays or rays from radioactive substances are used for diagnostic or therapeutic purposes. Such services include, but are not limited to, radium therapy, radioisotopes for diagnostic or therapeutic purposes (e.g., in nuclear medicine), diagnostic tests, such as aortograms, pyelograms, myelograms, arteriograms and ventriculograms, imaging services, x-rays, and diagnostic ultra-sounds. These operations are generally directed by a radiologist.

Laboratory Reimbursement Reduction

Effective for dates of service beginning January 1, 2018, the MHD reduced reimbursement rates for Laboratory services from 100% of the Medicare rate to 80% of the most current Medicare allowed laboratory rates. The outpatient hospital laboratory and independent laboratory reimbursement will be updated annually to reflect the most current 80% of the Medicare allowed laboratory rates. The 2018, enrollment data showed that there were 346 Independent Laboratories and 90 Independent X-Ray Services. In 2019, enrollment data revealed that there are 332 Independent Laboratories and 81 Independent X-Ray Services. There are many provider types who perform laboratory services, such as physicians, hospitals, FQHCs, RHCs, and clinics. No negative impact on access is expected. The MHD will analyze additional data to better represent the provider population performing laboratory services and the participants' access to such services.

Independent Diagnostic Testing Facility (IDTF)

These providers are independent of a hospital or a physician's office and offer medically necessary diagnostic tests. The IDTF may be a fixed location or a mobile entity. An IDTF must have one or more supervising physicians who are responsible for the direct and ongoing oversight of the quality of the testing performed, the proper operation and calibration of the equipment used to perform tests, and the qualification of non-physician personnel who use the equipment.

Ambulatory Surgical Center (ASC)

An Ambulatory Surgical Center (ASC) is a free-standing facility functioning as an independent business and administrative entity which maintains neither a physical nor a fiscal relationship to a hospital. An ASC is a facility designed, staffed, equipped, and operated for the primary purpose of providing surgical services. It is neither staffed nor equipped to provide overnight care to patients.

Rural Health Clinics (RHC)

The RHC Services Act of 1977, designating RHCs as health care providers, extended benefits to cover health care services to under-served rural areas where access to traditional physician care had been difficult. In those areas, specifically trained practitioners furnish the health care services needed by the community. RHCs must be located in a rural area that is designated a shortage area for primary care. To be eligible for this designation, a clinic must be located in an area not identified as "urbanized" by the Bureau of the Census and designated as a shortage or under-served area. RHCs must meet the additional staffing and health and safety requirements set forth by the RHC Act, be certified by the Public Health Service, be certified for participation in Medicare, and be enrolled as a MO HealthNet provider.

A RHC must be designated as either an independent or a provider-based RHC.

- Provider-based Rural Health Clinic (PBRHC): must be an integral and subordinate part of a hospital, skilled nursing facility, or home health agency, and under common licensure, governance, and professional supervision with its parent provider.
- Independent RHC: has no financial, organizational, or administrative connection to a hospital, skilled nursing facility or home health agency.

Federally Qualified Health Clinic (FQHC)

The Omnibus Budget Reconciliation Acts of 1989 (OBRA 89) and 1990 (OBRA 90) designates certain community-based health care organizations as unique health care providers called FQHCs. These laws establish health care services that MO HealthNet and Medicare must cover in an FQHC. The federal laws also set the reimbursement at reasonable cost to the FQHC for such services. In order to qualify for FQHC status, a facility must receive or be eligible for a grant under Section 329, 330 or 340 of the Public Health Service Act, meet the requirements for receiving such a grant, or have been a Federally Funded Health Center as of January 1, 1990.

The FQHC program has two goals:

1. To provide adequate reimbursement to community-based primary health care organizations (FQHCs) so that they, in turn, may better serve a large number of MO HealthNet participants and/or provide more services, thus improving access to primary care.
2. To enable FQHCs to use other resources previously subsidizing MO HealthNet to serve uninsured individuals who, although not eligible for MO HealthNet, have a difficult time obtaining primary care because of economic or geographic barriers.

Dental

Children under 21 years of age and participants in category of assistance for pregnant women, the blind or vendor nursing facility residents are eligible for the complete dental benefit. MO HealthNet considers additional dental services for adults with certain pre-existing medical conditions. Such services require a written referral from the participant's physician that must state the absence of the dental treatment would adversely affect a specific preexisting medical condition.

Reimbursement for dental services is on a FFS basis. The maximum allowable fee for a service has been determined by the MHD to be a reasonable fee, consistent with efficiency, economy, and quality of care. Payment for covered services is the lower of the provider's actual billed charge, which should be the provider's usual and customary charge to the general public for the service, or the maximum allowable per unit of service. The billed amount for supplies must reflect only the provider's cost. MO HealthNet payment for dental services is the lower of the provider's usual and customary charge to the general public or the MO HealthNet maximum allowable fee for service.

Dental Rate History

01/01/2016: 1% rate increase for all dental related services

07/01/2016: 2% rate increase for all dental related services

07/01/2017: 3% rate decrease for all dental related services

07/01/2018: 1.5% rate increase for all dental related services (Provider Bulletin Vol. 41, Number 16)

07/01/2019: 1.5% rate increase for all dental related services (Provider Bulletin Vol. 42, Number 11)

Rates were increased 1.5% on July 2018, and again on July 2019, which mooted the decrease from 2017. Missouri has seen a slight increase in the total number of enrolled dental providers which has improved access to dental care. Currently, there are a total of 1,172 enrolled dental providers.

Home Health Services

The conditions of coverage of the MO HealthNet Home Health Program are set forth in 13 CSR 70-90.010, Home Health Care Services. This rule incorporates, in large part, Medicare's standards and guidelines regarding coverage of home health services. Accordingly, the following sections of the Medicare Home Health Manual have been incorporated into the MO HealthNet policy:

- Skilled Nursing Care
- Home Health Aide Services
- Medical supplies
 - This includes Medicare's exclusion of coverage for drugs and biologicals as supplies. MO HealthNet does *not* incorporate the Medicare policy regarding medical appliances and durable medical equipment because such items are available to participants through the Durable Medical Equipment Program.
- Occupational Therapy
- Physical Therapy
- Speech Therapy
 - Regarding the therapies, the conditions of coverage are applicable to MO HealthNet coverage.

Home health services provide primary medically-oriented treatment or supervision to individuals with an acute illness, or an exacerbation of a chronic or long-term illness, which can be therapeutically managed at home. The care follows a written plan of treatment established and periodically reviewed by a physician.

NOTE: Home health services are performed in the participant's residence and in any setting in which normal life activities take place other than a hospital, nursing facility, intermediate care facility for individuals with intellectual disabilities or any setting in which payment is or could be made under MO HealthNet for inpatient services. The home health staff travel to provide services within these settings. The number of enrolled home health agencies shown in this AMRP does not reflect the number of staff available in each agency. The home health provider does not report to the MHD the number of employees they have providing services. If applicable, the MHD will analyze staffing availability.

Home Health Services Provider Participation

To participate in the MO HealthNet Home Health Program, the home health agency *must* be currently licensed with the Missouri DHSS, *must* be Medicare certified, and *must* have a current MO HealthNet provider agreement.

Home Health Services Participant Eligibility

Home health services are covered for most categories of assistance, except the Uninsured Women's Health Services, MORx and some categories of assistance do not cover Physical Therapy, Occupational Therapy, and Speech Therapy for the home health services. Home Health Program skilled therapy services are *not* covered for individuals covered under a limited benefit package. The participant may be eligible if they require intermittent skilled nursing care which is reasonable and necessary for the treatment of an injury or illness, or the participant requires physical, occupational or speech therapy for

conditions that meet policy guidelines. Home health services can only be provided in the participant's place of residence.

MO HealthNet Reimbursement for Home Health Services

Reimbursement for home health services is made on a FFS basis. The maximum allowable fee for a unit of service has been determined by the MHD to be a reasonable fee, consistent with efficiency, economy, and quality of care. Payment for covered services is the lower of the provider's actual billed charge, which should be the provider's usual and customary charge to the general public for the service, or the maximum allowable per unit of service. The billed amount for supplies must reflect only the provider's cost. MO HealthNet payment for home health services is the lower of the provider's usual and customary charge to the general public or the MO HealthNet maximum allowable fee for service.

Home Health Service Rate History

07/01/2015: rate increase per visit rate for all home health services to \$77.16; rate increased to make the rate stabilization that all agencies were getting the same rate per visit.

01/01/2016: 1% rate increase per visit for all home health services funded with Tax Amnesty Fund to a cap rate of \$77.93.

07/01/2016: 2% rate increase per visit for all home health services to a cap rate of \$79.47

07/01/2017: 3% rate decrease per visit for all home health services to a cap rate of \$77.16

07/01/2018: 1.5% rate increase per visit; cap rate of \$78.32 (Provider Bulletin Volume 41, Number 01).

07/01/2019: 1.5% rate increase per visit; cap rate of \$79.49 (Provider Bulletin Volume 42, Number 02).

Home health agencies experienced multiple rate increases during the review period and one decrease in 2017. In comparing the original report year of 2015 to the current 2019 rate, the total rate has risen 3% with a cap rate increase of \$2.33.

	Licensed Home Health Agencies	Number Enrolled in Medicaid
2016	n/a	151
2017	n/a	147
2018	162	142
2019	159	129

Although there has been a slight decline in the number of licensed home health agencies enrolled in Medicaid, Missouri continues to see an enrollment rate above 80% of those licensed. The MHD will continue to monitor any impact rate changes have on access and consider any public comments received.

Reimbursement Methodology

The majority of services provided by physician-related professionals are reimbursed on a fee schedule although a few services are reimbursed manually, whereby each procedure or claim is priced individually by a medical consultant based on the unique circumstances of the case. Certain procedures are only reimbursable with prior approval.

Services rendered by someone other than a physician or podiatrist, including appropriate supplies, are billable by the physician only where there is direct personal supervision by the physician. This applies to services rendered by auxiliary personnel employed by the physician and working under his/her on-site supervision, such as nurses, non-physician anesthetists (including Certified Registered Nurse Anesthetists and Anesthesiologist Assistants), technicians, and other aides.

The following advanced practitioners can bill MO HealthNet independently from a physician, but must still operate within the terms of their collaborative practice arrangement with the physician:

- APRN and NP,
- Nurse Midwives,
- PA, and
- AP, once licensed by the Board of Healing Arts.

The services of physicians, podiatrists, advanced practitioners, and behavioral health providers may be administered in multiple settings, including the physician's office, the participant's home, or other place of residence such as a nursing facility, the hospital (inpatient/outpatient) or settings such as a medical clinic or ambulatory surgical care facility. The services of a nurse midwife may also be administered in the home of the participant (delivery and newborn care only) or a birthing center.

MO HealthNet reimbursement may also be made directly to the facility which employs the health care professionals. Facilities which receive direct payment from the physician-related services program include clinics, laboratory and x-ray facilities, IDTF, RHCs, and FQHCs, and hospitals (inpatient and outpatient). Each provider offering health care services through the facility, in addition to being employed by the participating clinic, must be a MO HealthNet provider. Ambulatory surgical centers are also reimbursed for a facility fee which does not include professional services of the performing practitioner.

FQHCs and RHCs

The reimbursement methodology for RHCs and FQHCs is different than other physician-related services. FQHCs are reimbursed on an interim basis at a specified percentage of the billed MO HealthNet FQHC covered charges. For dates of service prior to January 1, 2016, FQHC services were reimbursed at 97% of the covered charges and for dates of service beginning January 1, 2016, FQHC service are reimbursed at 92% of the covered charges. FFS claims are submitted to the MHD and are paid at the applicable interim percentage. FQHCs that are contracted with MO HealthNet Managed Care health plans also receive payments from the health plan. For dates of service prior to July 1, 2015, FQHCs that were contracted with the health plans were paid a rate negotiated with the health plan and for dates of service beginning July 1, 2015, health plans are required to pay 90% of covered charges. An FQHC contracted with a health plan may submit a request to MHD for a supplemental interim payment for the difference between the health plan payment and the applicable interim payment percentage. Beginning January 1, 2016, these

requests may only be submitted on a quarterly basis. An annual audit of the MO HealthNet cost report is performed by the Institutional Reimbursement Unit (IRU) to determine reasonable costs. A settlement is made to adjust the reimbursement to 100% of the reasonable costs to provide MO HealthNet FQHC covered services.

Hospital-based, or provider-based, RHCs (PBRHCs) are reimbursed on an interim basis at the lower of 100% of their usual and customary charges or their cost-to-charge ratio. For dates of service beginning July 1, 2015, PBRHCs that are contracted with MO HealthNet Managed Care health plans are to be reimbursed by the health plan at 90% of covered charges. For dates of service prior to July 1, 2015, PBRHCs that were contracted with health plans were paid a rate negotiated with the health plan. A PBRHC contracted with a health plan may submit a request to MHD for a supplemental interim payment for the difference between the health plan payment and the applicable interim payment percentage. Beginning January 1, 2016, these requests may only be submitted on a quarterly basis. An annual review of the finalized Medicare cost report is done by the IRU to determine reasonable costs. A settlement is made to adjust the reimbursement to 100% of the reasonable costs to provide MO HealthNet PBRHC covered services. The RHCs that are based in skilled nursing facilities and home health agencies are reimbursed their usual and customary charges multiplied by the lower of the Medicare RHC rate or the rate approved by the MHD.

An independent RHC (IRHC) has no financial, organizational or administrative connection to a hospital, skilled nursing facility or home health agency. IRHCs are reimbursed on an interim basis at 100% of their Medicare RHC rate. For dates of service beginning July 1, 2015, IRHCs that are contracted with MO HealthNet Managed Care health plans are to be reimbursed by the health plan at 90% of the Medicare RHC rate. For dates of service prior to July 1, 2015, IRHCs that were contracted with health plans were paid a rate negotiated with the health plan. An IRHC contracted with a health plan may submit a request to MHD for a supplemental interim payment for the difference between the health plan payment and the applicable interim payment percentage. Beginning January 1, 2016, these requests may only be submitted on a quarterly basis. An annual audit of the Medicare cost report is reviewed by the IRU within the MO HealthNet Division to determine reasonable costs, which is subject to a limit of the Medicare cost per visit. A settlement is made to adjust the reimbursement to 100% of the reasonable costs to provide MO HealthNet IRHC covered services.

Telehealth

Certain health professionals are also authorized to provide services through telehealth technology. The health professional receives reimbursement for services rendered according to the fee schedule. In addition, the originating site which hosts the MO HealthNet participant during the telehealth conference is eligible to receive an originating site facility fee. The MHD will not reimburse the originating site fee if the distant site and originating site are within 24 miles of one another.

Copayment

A copayment, a portion of the providers' charges paid by the participant, is required on many physician related services and is determined in state regulation (13 CSR 70-4.050). According to 42 CFR Section 447.56(c) (1), MHD is required to reimburse providers a rate less any assessed co-pay. It is the responsibility of the provider to collect the copay from the participant. The copayment for a service can

range from \$0.50 to \$2.00 for physician-related services; however, some services and participants are exempt from copay requirements.

Health Homes

Practices that are enrolled in MO HealthNet's primary care or CMHC health home programs receive a per-member, per month (PMPM) reimbursement for each eligible health home patient enrolled in the program who receives health home services in a given month. See service information below for additional information on health homes.

Physician-Related Services Rate History

01/01/2013-12/31/2014: Federally funded rate increase for certain physician specialties for primary care evaluation and management and services related to immunization administration for vaccines and toxoids.

01/01/2016: 1% rate increase for all physician related services.

07/01/2016: 2% rate increase for all physician related services.

07/01/2016: 3.79% rate increase for Medicare parity for physician-related services.

07/01/2017: 3% rate decrease for all physician related services. (Provider Bulletin 40, Number 7)

07/01/2018: Maximum allowable rates for certain procedures in the Physician Program are increased (Provider Bulletin 41, Number 13)

07/01/2019: Maximum allowable rates for certain procedures in the Physician Program are increased (Provider Bulletin 42, Number 10)

Although there was a slight decrease in rates for physician-related service providers in 2017, historically, rates have been on the rise for this provider type. There has not been any negative impact on the number of enrolled providers due to rate adjustments as the number of enrolled providers has been on the rise.

Private Duty Nursing

Private Duty Nursing (PDN) is the provision of individual and continuous care (in contrast to part-time or intermittent care) provided by a licensed nurse acting within the scope of the Missouri Nurse Practice Act according to an individualized Plan of Care approved by a physician. Services within the MO HealthNet PDN Program include shift care by a RN or licensed practical nurse (LPN). Custodial, child care, respite and transportation services are not covered services under the PDN Program.

The PDN who delivers direct care cannot be a member of the family or household member. A family member is defined as a parent; sibling; child by blood, adoption or marriage; spouse; grandparent or grandchild.

PDN Provider Participation

To participate in the MO HealthNet PDN Program, the PDN provider must satisfy one of the following requirements:

- Be a Medicare certified and MO HealthNet Program enrolled home health agency provider; or
- Be accredited by the Joint Commission for Accreditation of Health Organization (JCAHO) or the Community Health Accreditation Program (CHAPS); or
- If one of the above criteria is not met, a written proposal must be submitted which describes the agency and its service delivery system, assures understanding of and compliance with the standards of the PDN Program; and documents the agency's administrative and fiscal ability to provide the services in accordance with standards as established in 13 CSR 70- 95.010, Private Duty Nursing Care under the HCY Program.

PDN Participant Eligibility

PDN services are a covered benefit for children under 21 and eligible for HCY services. PDN services are not a covered benefit for participants over the age of 21.

MO HealthNet Reimbursement for PDN Services

A unit of PDN care service is a full 15 minutes of direct service to the service participant. Combined or partial units are *not* billable to MO HealthNet. Services available under the PDN Program are RN PDN and LPN PDN. The maximum number of units authorized per day is sixty-four (16 hours). Exceptions to this policy may be made for short periods of time depending upon the individual needs of the child. Reimbursement for PDN services is made on a FFS basis. The maximum allowable fee for a unit of service has been determined by the MHD to be a reasonable fee, consistent with efficiency, economy, and quality of care. Payment for covered services is the lower of the provider's actual billed charge, which should be the provider's usual and customary charge to the general public for the service, or the maximum allowable per unit of service.

Payment is made in accordance with the fee per unit of service as defined and determined by the MHD.

- A unit of service is 15 minutes.
- The fee per unit of service is the same for the services of the RN or LPN.
- The fee per unit of service is based on the determination by the state agency of the reasonable cost of providing the covered services on a statewide basis and within the mandatory maximum payment limitations.
- Payment is made on the lower of the established rate per service unit or the provider's billed charges. The charge billed to MO HealthNet may *not* be more than a provider's ordinary charge to the general public for the same services.

PDN Rate History

01/01/2016: 3% rate increase for PDN

07/01/2016: 3% rate increase for PDN (to total 6% increase from the 12/31/15)

07/01/2017: 6% decrease for PDN (return to same reimbursement rate as 12/31/15 (Provider Bulletin 40, Number 04)

07/01/2018: 4.5% increase for PDN (Provider Bulletin 41, Number 04)

The agencies experienced a rate increase on January 1, 2016, and on July 1, 2016. The July 1, 2017 decrease, essentially removed the last two increase taking rates back to the rate prior to January 1, 2016. Effective July 1, 2018, rates were increased by 4.5%.

In 2018, there were 69 PDN enrolled with Medicaid and 14,487 participants out of the total Medicaid population who could be eligible for PDN services. The 2019 enrollment data shows there are 71 PDN enrolled with Medicaid and 6,429 FFS-only members eligible for the services. The difference in members for 2019 is a result of MHD improving its methodology to only include the FFS eligible population in its AMRP analysis of PDN, rather than the entire Medicaid population. This method allowed the MHD to have a better understanding of how access has been impacted on this specific population. At this time, there does not appear to be any negative impact on FFS access to PDN.

Access Monitoring Review Plan

The MHD currently utilizes multiple data sources and methodologies to guide state policies affecting access to Medicaid services and, as part of future enhancements to its analysis, will develop additional tools to inform whether participants have sufficient access to care. These tools will provide access to a larger body of data or organize the existing data in ways which illustrate the successes or gaps in FFS service access.

Currently, the MHD publishes performance and demographic summary reports to keep the public informed regarding the performance of its programs and their impact on the health of Missouri participants in the Medicaid program.

The *Quick Facts About Missouri Department of Social Services* website provides a county level look at the number of people enrolled for MO HealthNet services as well as the MO HealthNet dollars spent in a given state fiscal year. Also found on this site are estimates of the federal portion of the MO HealthNet dollars spent and MO HealthNet dollars for inpatient hospital services, physician services, nursing home services, pharmacy services, and Managed Care payments.³

The *Annual Summaries for Enrollment Data* website provides the public with enrollment totals for each of the Managed Care Organizations by region.⁴

Data to Assess Access: Future Tools and Reports

In addition to the various initiatives that were discussed previously, the MHD is working to develop additional tools to assess whether there is adequate access for specific provider types as well as for those providers who provide specific services. The MHD is in the process of upgrading its network adequacy software to better analyze access and potential disruptions in an effort to become more proactive when access to care may be at risk. The MHD will also develop the reporting capability to look at capturing or monitoring the impact of telemedicine and telemonitoring on providing adequate care for FFS participants.

The DSS, Missouri Medicaid Audit & Compliance Division (MMAC) is working on a number of initiatives in an effort to improve internal, administrative efficiencies and to improve the number of providers participating in the MO HealthNet program. The administrative efficiencies are intended to reduce and streamline the process of provider enrollment and revalidation, which should decrease the provider's administrative costs and consequently, the reasons why a provider may not participate in the Medicaid program.

In January 2019, MMAC implemented a new self-service portal for providers to use to make revalidating their enrollment easier and quicker. The new portal also allows the providers to make changes to their practice locations themselves rather than having to submit a change request form to MMAC.

³ <https://dss.mo.gov/mis/cqfacts/>

⁴ <https://dss.mo.gov/mhd/mc/pages/enroll.htm>

The MHD is also in the early stages of developing a Business Intelligence Solution and Enterprise Data Warehouse (BIS-EDW) which will allow data to be easier to obtain when analyzing network access within the Medicaid population.

Data to Assess Access: Service-Specific Analyses

Consistent with 42 CFR Section 447.203(5) (ii), MHD analyzes the following service categories:

- Primary care;
- Physician specialist services;
- Behavioral health;
- Pre and post-natal obstetrics; and
- Home health services

The MHD added three additional categories due to restructuring of rates which had the potential to affect access to care at the time they were implemented:

- Pharmacy agencies
- Nursing facilities
- Outpatient hospitals

MHD utilized existing resources for this analysis and public comment. These resources included:

- State Fiscal Year Rate Study
- Fee-for-Service Network Access Report
- Utilization Report.

State Fiscal Year Rate Study

Section 208.152(1)(25) of the Revised Statutes of Missouri requires the MO HealthNet Division (MHD) to *annually . . . report the status of MO HealthNet provider reimbursement rates as compared to one hundred percent of the Medicare reimbursement rates and compared to the average dental reimbursement rates paid by third-party payors licensed by the state.* The MHD has submitted rate studies annually since January 1, 2018. The rate study submissions are associated with the July 2018, *Four-Year Plan to Reach Reimbursement Parity initiative* (also referred to as the Four-Year Plan). This study is based on state fiscal year (SFY) 2018 rates.

Methodology

To complete this study, utilization reports were obtained from the Medicaid Management Information System (MMIS) for Ambulance, Audiology, Dental, Durable Medical Equipment, Optical, Physician and Rehabilitation Center Therapy for SFY 2018. These reports identified the type of service, provider type, units paid, paid amount, procedure codes, modifiers and the pricing indicator. The MO HealthNet allowed amount for SFY 2018 for all programs was obtained from the MMIS. The Medicare allowed amount as of January 1, 2018, was also obtained from the MMIS.

Some MO HealthNet programs are not included in this report. Please see the tables *(below)* for a detailed explanation.

MO HealthNet Program Areas Excluded from SFY-2017 Rate Study	
MO HealthNet	Rationale
Comprehensive Day Rehab	This program is unique to Missouri and valid Medicare comparisons are not available.
Federally Qualified Health Center (FQHC)	Per federal law, both Medicare and MO HealthNet reimburse FQHCs for 100% of costs. Cost settlements are based on data from audited cost reports.
Home Health	MO HealthNet reimburses on a per visit basis, while Medicare reimburses per episode of diagnosis. Valid comparisons between the two reimbursement methodologies are not possible.
Hospice	Rates are established annually by Medicare and authorized by Section 1814 (I) (1) (C) (ii) of the Social Security Act. Since MO HealthNet's reimbursement mirrors Medicare reimbursement, no adjustments are required.
Hospitals	MO HealthNet reimburses hospitals using a rate per day. Medicare reimburses hospitals through Diagnostic Related Groups (DRGs). Through the DRG system, Medicare has established set amounts to pay hospitals for each diagnosis. The reimbursement methodologies used by MO HealthNet and Medicare is different enough that no comparison is possible.
Non-Emergency Medical Transportation (NEMT)	Medicare does not cover NEMT. MO HealthNet NEMT capitated rates are paid for each participant based on a contractual arrangement with a third party vendor.
Nursing Facilities	Most nursing facility beds in Missouri are paid through the MO HealthNet program using a rate per day based on individual cost reports. Comparability to Medicare is not possible because Medicare only pays for nursing facility care in very limited circumstances and then for only a very limited time in limited amounts.
Pharmacy	MO HealthNet reimburses at the lower of Wholesale Acquisition Cost (WAC) plus 10%, the Federal Upper Limit (FUL), the Missouri Maximum Acquisition Cost (MAC) or billed charge. Medicare Part D is based on capitated rates and comparability to MO HealthNet Pharmacy is not possible.
Rural Health Center (RHC)	Per federal law, both Medicare and MO HealthNet reimburse independent RHCs for 100% of allowable cost per visit up to a cap established by CMS. Provider based (hospital based) RHCs are paid based on a ratio of Medicaid charges to total charges. Cost settlements are based on data from audited cost reports.
State Institutions	The reimbursement methodology for state institutions is similar to that of the MO HealthNet Hospital program.
School-Based Therapy	Services are provided for children in a school-based setting. Medicare does not reimburse for these types of services.

The tables below reflect the estimated SFY-2018 paid amount based on SFY-2017 utilization and SFY-2018 rates.

MO HealthNet Program Areas Excluded from SFY-2018 Rate Study	
MO HealthNet	Rationale
Comprehensive Day Rehab	This program is unique to Missouri and valid Medicare comparisons are not available.
Federally Qualified Health Center (FQHC)	Per federal law, both Medicare and MO HealthNet reimburse FQHCs for 100% of costs. Cost settlements are based on data from audited cost reports.
Home Health	MO HealthNet reimburses on a per visit basis, while Medicare reimburses per episode of diagnosis. Valid comparisons between the two reimbursement methodologies are not possible.
Hospice	Rates are established annually by Medicare and authorized by Section 1814 (I)(1)(C)(ii) of the Social Security Act. Since MO HealthNet's reimbursement mirrors Medicare reimbursement, no adjustments are required.
Hospitals	MO HealthNet reimburses hospitals using a rate per day. Medicare reimburses hospitals through Diagnostic Related Groups (DRGs). Through the DRG system, Medicare has established set amounts to pay hospitals for each diagnosis. Valid comparisons between the two reimbursement methodologies are not possible.
Non-Emergency Medical Transportation (NEMT)	Medicare does not cover NEMT. MO HealthNet NEMT capitated rates are paid for each participant based on a contractual arrangement with a third party vendor. Valid Medicare comparisons are not available.
Nursing Facilities	Most nursing facility beds in Missouri are paid through the MO HealthNet program using a rate per day based on individual cost reports. Comparability to Medicare is not possible because Medicare only pays for nursing facility care in very limited circumstances and then for only a very limited time in limited amounts.
Pharmacy	MO HealthNet reimburses by applying the following hierarchy methodology: Federal Upper Limit (FUL) price, plus professional dispensing fee; if there is no FUL, Missouri Maximum Allowed Cost (MAC), plus professional dispensing fee; if no FUL or MAC, Wholesale Acquisition Cost (WAC) minus 3.1%, plus professional dispensing fee, OR The usual and customary (U&C) charge submitted by the provider IF it is lower than the chosen price (FUL, MAC, or WAC). Medicare Part D is based on capitated rates and comparability to MO HealthNet Pharmacy is not possible.
Rural Health Center (RHC)	Per federal law, both Medicare and MO HealthNet reimburse independent RHCs for 100% of allowable cost per visit up to a cap established by CMS. Provider based (hospital based) RHCs are paid based on a ratio of Medicaid charges to total charges. Cost settlements are based on data from audited cost reports.
State Institutions	The reimbursement methodology for state institutions is similar to that of the MO HealthNet Hospital program.
School-Based Therapy	Services are provided for children in a school-based setting. Medicare does not reimburse for these types of services.

The tables below reflect the estimated SFY-2019 paid amount based on SFY-2018 utilization and SFY-2019 rates.

MO HealthNet Program Areas Excluded from SFY-2019 Rate Study	
MO HealthNet	Rationale
Comprehensive Day Rehab	This program is unique to Missouri and valid Medicare comparisons are not available.
Federally Qualified Health Center (FQHC)	Per federal law, both Medicare and MO HealthNet reimburse FQHCs for 100% of costs. Cost settlements are based on data from audited cost reports.
Home Health	MO HealthNet reimburses on a per visit basis, while Medicare reimburses per episode of diagnosis. Valid comparisons between the two reimbursement methodologies are not possible.
Hospice	Rates are established annually by Medicare and authorized by Section 1814 (l) (1) (C) (ii) of the Social Security Act. Since MO HealthNet's reimbursement mirrors Medicare reimbursement, no adjustments are required.
Hospitals	MO HealthNet reimburses hospitals using a rate per day. Medicare reimburses hospitals through Diagnostic Related Groups (DRGs). Through the DRG system, Medicare has established set amounts to pay hospitals for each diagnosis. Valid comparisons between the two reimbursement methodologies are not possible.
Non-Emergency Medical Transportation (NEMT)	Medicare does not cover NEMT. MO HealthNet NEMT capitated rates are paid for each participant based on a contractual arrangement with a third party vendor. Valid Medicare comparisons are not available.
Nursing Facilities	Most nursing facility beds in Missouri are paid through the MO HealthNet program using a rate per day based on individual cost reports. Comparability to Medicare is not possible because Medicare only pays for nursing facility care in very limited circumstances and then for only a very limited time in limited amounts.
Pharmacy	MO HealthNet reimburses by applying the following hierarchy methodology: Federal Upper Limit (FUL) price, plus professional dispensing fee; if there is no FUL, Missouri Maximum Allowed Cost (MAC), plus professional dispensing fee; if no FUL or MAC, Wholesale Acquisition Cost (WAC) minus 3.1%, plus professional dispensing fee, OR The usual and customary (U&C) charge submitted by the provider IF it is lower than the chosen price (FUL, MAC, or WAC). Medicare Part D is based on capitated rates and comparability to MO HealthNet Pharmacy is not possible.
Rural Health Center (RHC)	Per federal law, both Medicare and MO HealthNet reimburse independent RHCs for 100% of allowable cost per visit up to a cap established by CMS. Provider based (hospital based) RHCs are paid based on a ratio of Medicaid charges to total charges. Cost settlements are based on data from audited cost reports.
State Institutions	The reimbursement methodology for state institutions is similar to that of the MO HealthNet Hospital program.
School-Based Therapy	Services are provided for children in a school-based setting. Medicare does not reimburse for these types of services.

Comparison to MO HealthNet Rates When Medicare or Dental Rates Were Available

- When available, the current Medicare allowed amount was obtained through the MMIS.
- For Dental rates, MHD used the *2016 National Dental Advisory Service Fee Report* (Yale Wasserman, 2016) for the SFY-2017, the *2017 National Dental Advisory Service Fee Report* (Yale Wasserman, 2017) for the SFY-2018, and the *2018 National Dental Advisory Service Fee Report* (Yale Wasserman, 2018). Target rates were at the 50th percentile, meaning half of dentists charge more and half charge less than the target rate. This is referred to as the Usual, Customary, and Reasonable (UCR) target throughout the report.
- Data was grouped according to the age of the participant on the date the service was provided. Children were defined as individuals under the age of 21, and adults were defined as individuals age 21 and over.
- Codes were grouped together logically for each program area. Codes not utilized in SFY 2015, 2016, 2017, and 2018 were excluded from the analysis.
- The reported measures include number of codes, units of service, MHD cost, comparison group cost and the MHD cost as a percentage of the comparison group.
- The MHD cost was computed by multiplying the number of units delivered for each code by the current MO HealthNet allowed amount. This calculation was used instead of the amount paid because the amount paid may reflect adjustments made, which are unrelated to the rate.
- The comparison group cost was calculated by multiplying the number of units delivered for each code by the current allowable Medicare or dental UCR.
- The percentage comparison rate was calculated by measuring the MHD cost as a percentage of the comparison group.

Analysis of MO HealthNet Rates with No Medicare Comparison

Codes were grouped into the “no Medicare comparison group” if:

- MHD reimburses the code but Medicare does not reimburse the code; or
- MHD manually prices the code and there is no valid Medicare comparison.

Factors Influencing the Parity Comparison

Several factors may influence the parity comparison between MHD and Medicare rates:

- If a specific Medicare rate lowered and the MO HealthNet rate remained constant, then the parity percentage for that code would have increased. Conversely, if Medicare raised its rate and the MO HealthNet rate remained constant then the parity percentage decreased.

- The UCR target for the Dental program could have changed from the previous year. Therefore, a similar effect may have occurred in the Dental program.
- The methodology used in calculating the comparison costs' aggregated codes, their rates and utilization may influence findings. Utilization reports were updated to SFY-2016, SFY-2017, and SFY-2018 utilization. If utilization changed between years, the percentage of parity may have fluctuated, too. Likewise, the addition of newly utilized codes in SFY-2016, SFY-2017, and SFY-2018 would influence the parity percentage.
- As required by Section 1834(a)(1)(F)(ii) of the Social Security Act, certain Medicare rates for Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) equipment received a fee schedule adjustment. Rates were phased in starting on January 1, 2017 so that the fee schedule amounts in all areas were based on a 50/50 blend of current rates and adjusted rates. This allowed a six-month transition period where health outcomes and access to these items and services could be closely monitored. The fully adjusted rates were phased in on July 1, 2017. This resulted in an increase in parity for those affected rates.
- Providers received a fee schedule rate increase approved by the Governor and the General Assembly beginning SFY 2019.

Conclusion

The overall MO HealthNet rate for the SFY 2019 rate study is 60% of Medicare. This is a 3% increase from the percentage found in the SFY 2018 rate study and a 2% increase from the percentage found in the SFY 2017 rate study

Nursing Facilities

Physician-directed services are provided in certified Nursing Facility (NF) to individuals whose physical or mental health condition requires services on an inpatient basis. To qualify for NF services, a participant *must* have an assessed point level of at least 24, as set forth in State Regulation [19 CSR 30-81.030](#), using the assessment procedure as described therein.

There are specific categories of assistance that could qualify to be eligible for NF services. If a participant qualifies for NF services, MO HealthNet *does* cover NF services in these categories of assistance:

- MO HealthNet Blind Programs,
- FFS Only Children's Programs,
- Traditional Medicaid, and
- QMB – Medicare Restrictions apply and some services are not covered by Medicare. MO HealthNet reimburses Medicare cost sharing but participants are not eligible for NF services reimbursed by MO HealthNet if no other category of assistance is identified with the QMB participant.

The other MO HealthNet categories of assistance are not eligible to qualify for NF services reimbursed by MO HealthNet. MO HealthNet *does not* cover NF services in these categories of assistance:

- MO HealthNet for Adults programs,
- MO HealthNet for Pregnant Women programs,
- MO HealthNet for Kids programs,
- CHIP Kids programs,
- MO HealthNet Uninsured Women's programs,
- BCCCP programs,
- TEMPT and PE, and
- Missouri Rx (MoRx) program.

NFs are not required to participate in Medicaid, the MO HealthNet Vendor NF program. In order to participate in the MO HealthNet Vendor Nursing Facility Program (i.e. the Missouri Title XIX Medicaid program), a facility *must* be licensed as a skilled nursing facility (SNF) or an intermediate care facility (ICF), and *must* also be certified as meeting federal requirements for providers of NF services for the Medicaid program. A NF may also choose to execute a provider agreement with the Centers for Medicare & Medicaid Services (CMS) to provide services under Title XVIII (Medicare), if it is licensed as a SNF or ICF and is certified as meeting federal requirements for providers of NF services for the Medicare program. Medicare facilities are *not* required to participate in Medicaid. Medicaid NFs are not required to participate in Medicare. However, many facilities do have provider agreements with both programs.

If a facility has valid participation agreements with both Medicare and MO HealthNet (Medicaid), the MHD may reimburse the NF for the Medicare coinsurance up to the MHD allowable amount for participants' eligible under both programs, if they reside in a Medicare/Medicaid certified bed, and if the stay is eligible for Medicare reimbursement. As permitted by Federal law, states can limit Medicare cost-sharing payments. The MHD repays NF services for Medicare/Medicaid dual eligible participants and the reimbursement is limited to what MHD reimburses. If Medicare reimbursed the NF less than what MHD would reimburse, MHD will reimburse the difference up to MHD's maximum allowable reimbursement. If Medicare reimbursed the NF more than what MHD would reimburse, MHD does not

make any additional reimbursements. Therefore, MHD may not reimburse the full coinsurance amount but the NFs can claim that amount as a bad debt on their Medicare cost report.

NFs are reimbursed a per diem rate for each MO HealthNet participant residing in the facility. The NFs' total reimbursement is determined by multiplying the per diem rate for the facility by the residents' days of care less any patient surplus. The patient surplus is the amount of money that a NF resident contributes to his or her own care. The patient surplus for each resident is determined by the FSD and is based on the participant's income less specified adjustments, such as insurance premiums, personal needs allowance, etc.

NF per diem rates are based on a prospective reimbursement system and each NF has a distinct reimbursement rate calculated on its rate setting cost report. The rates for the industry are established on a particular cost report year and may be adjusted in subsequent years for global per diem rate adjustments, such as trends, which are granted to the industry as a whole by the General Assembly and approved by the Governor. The base rate will not change or be rebased until the rates are recalculated on another cost report year. NF rates were last rebased in SFY 2005 using 2001 cost report data trended to 2005. This rate has been adjusted for global per diem rate adjustments through SFY 2019.

A cost component style reimbursement system is used to determine the rate. In this method, costs are broken into separate categories, allowing flexibility in targeting reimbursement methodologies to achieve desired results. The reimbursement system was developed to emphasize quality patient care. This system consists of four cost center components, a working capital allowance, and incentives. Expenses are classified according to the type of cost and a ceiling is set for each cost component.

The four cost center components are 'Patient Care,' 'Ancillary,' 'Administration,' and 'Capital.' Ceilings are set to limit the reimbursement allowed for a cost component. The ceilings are set at 120% of the cost component median for 'Patient Care' and 'Ancillary' and 110% of the cost component median for 'Administration.' The 'Capital' cost component is calculated using a Fair Rental Value system. A working capital allowance is calculated based upon the per diems determined from the cost components. A facility may also enhance its rate by qualifying for incentives that target patient care, such as patient care incentive, ancillary incentive, and multiple component incentive.

The per diem rate for each cost component is determined by dividing the allowable Medicaid cost by the patient days, which is the cost per patient day, and is limited to the ceiling. The administration and capital cost components are also subject to an 85% minimum utilization adjustment. The cost per patient day is calculated using the greater of the actual patient days or a calculated minimum level of days.

NFs may also receive special per diem adjustments, if they meet the specific criteria for the adjustment. The Nursing Facility Reimbursement Allowance (NFRA) is also an allowable Medicaid cost. Once the facility's rate is established on its base year cost report, the current NFRA rate is added to the rate to determine the total reimbursement rate.

MO HealthNet Nursing Facility Program Rate History

Nursing facilities experienced a rate decrease in SFY 2018 of 3.39% which resulted in the MHD adding this category to the AMRP. This decrease brought the average rate nearly in alignment with the rate in July 2015. In SFY 2019, the MHD increased the nursing facilities rate by 5.47% which brought the average rate to its highest point within the network access review period.

SFY	Effective Date	Rate Increase / (Decrease)	Percent Increase / (Decrease)	Average Rate
SFY 2019	2/1/19	\$0.54	0.33%	\$161.49
	7/1/18	\$7.83	4.86%	\$160.95
SFY 2018	8/1/17	(\$5.37)	(3.39%)	\$153.12
SFY 2017	7/1/16	\$2.83	1.82%	\$158.49
SFY 2016	1/1/16	\$2.09	1.36%	\$155.66
	7/1/15	\$1.29	0.85%	\$153.57
	Average for SFY	\$2.34	1.53%	\$154.62

NOTE: The rate increase effective 2/1/19 represents an annualized SFY 2019 increase of \$0.54. The actual increase for February to June 2019 was \$1.29.

NF Rate Comparison to General Population

In 2016, the average NF Private Pay reimbursement rate was \$201.27 per patient per day. The Private Pay reimbursement rate includes patients who pay out of pocket, patients with commercial insurance, long-term care insurance, etc.

Comparability to Medicare is not appropriate because Medicare only pays for NF care in very limited circumstances and then for only a very limited time in limited amounts.

Outpatient Hospital Services

Outpatient hospital services are those services provided to a person who has not been admitted by the hospital as an inpatient but is registered on the hospital records as an outpatient and receives services from the hospital. The types of treatment and services shown below are covered when provided in the outpatient hospital clinic or emergency room and under the direct supervision of a medical professional. A medical professional is a physician or other person authorized by State licensure law to order hospital services for diagnosis or treatment of the patient.

MO HealthNet Covered Outpatient Hospital Services:

- Preventive,
- Diagnostic,
- Therapeutic,
- Palliative,
- Therapies including:
 - Chemotherapy
 - Radiation therapy
 - Physical therapy
 - Routine dialysis treatment,
- Medical and surgical supplies,
- Medications that are administered on-site,
- Injections and immunizations, and
- Observation.

Hospitals are not required to participate in the Medicaid program (MO HealthNet). In order to participate in the MO HealthNet Hospital Program, the hospital provider must be licensed by the DHSS as an acute care, psychiatric, or rehabilitation hospital unless the facility is exempt from licensure because it is a city or state operated facility. The provider must be certified by the DHSS for participation in the Title XVIII Medicare Programs.

The majority of MO HealthNet categories of assistance qualify for outpatient hospital services. There are specific procedures not covered by MO HealthNet and some categories of assistance have very limited coverage.

- The Women's Health Services category of assistance has limited coverage for family planning and limited testing and treatment of sexually transmitted diseases.
- The MO HealthNet TEMP program has limited coverage for ambulatory prenatal care.
- The MORx category of assistance is not eligible for outpatient hospital services.
- For QMB, there are Medicare restrictions and some services are not covered by Medicare.

Outpatient Surgical Procedures

Outpatient surgical procedures are performed in a hospital or clinic. Outpatient surgery is known as same-day or ambulatory surgery that occurs when the patient is expected to go home the same day as the surgery. Typically, the patient does not need an overnight hospital bed. Outpatient surgery can reduce health care costs and utilizes improved surgical instruments with less invasive surgical techniques. Outpatient surgeries have expanded to include complex surgeries for patients with more complex medical problems.

Outpatient Hospital Change in Reimbursement Methodology

Effective January 1, 2019, the MHD changed the prospective outpatient hospital services reimbursement methodology, including the methodology by which certain Outpatient Surgical Procedures, Outpatient Radiology, and the Telehealth Originating Site Fees are reimbursed. The change in methodology for certain Outpatient Surgical Procedures, Outpatient Radiology, and the Telehealth Originating Site Fees only applies to hospitals performing these services in an outpatient setting.

A Draft AMRP is posted for public comment. The comments received during the comment period related to the change in reimbursement methodology can be found on Appendix C and will continually be updated to reflect further stakeholder input.

Outpatient Surgical Procedures Reimbursement Methodology

Effective January 1, 2019, the MHD updated certain outpatient surgical procedures to be reimbursed on a fee schedule instead of a percentage of the agency's billed charges. The MHD added specific procedure codes and rates to the fee schedule.

The MHD currently reimburses outpatient surgical procedures as a percentage of billed charges. The prospective outpatient payment percentage for in-state-hospitals is currently calculated using the Medicaid overall outpatient cost-to-charge ratio from the fourth, fifth, and sixth prior base year cost reports regressed to the current SFY. As part of the regression analysis, a hospital's outpatient payment percentage is limited to a downward adjustment of 15% from the previous year with no limit on the upward swing, unless the hospital chose the lower upward and downward swing option of 6%. Once a hospital has chosen an option, it shall be fixed and applied, beginning with the year selected. If a hospital has not chosen an option, the default is the downward adjustment of 15%, from the previous year with no limit on the upward swing. The prospective outpatient payment percentage shall not exceed 100%, and shall not be less than 20%. Outpatient cost-to-charge ratios will be determined in the desk review of the base year cost reports. Costs and charges for services not reimbursed as a percentage of billed charges shall be excluded when calculating the outpatient cost-to-charge ratios used to determine outpatient percentage rates.

The prospective outpatient payment percentage for out-of-state hospitals is calculated by taking each in-state provider's prospective outpatient payment percentage multiplied by the hospital specific charges for the second prior calendar year to determine the estimated payments by hospital. Then the total estimated payments are divided by the total trended charges to determine the weighted average percentage. The out-of-state hospitals receive the weighted average percentage unless the hospital has

requested to have their prospective outpatient payment percentage calculated based on cost report data in the same manner as the in-state hospitals. The prospective outpatient payment percentage for SFY 2019 for the out-of-state hospitals is 27%.

The following list below demonstrates the surgical procedure code rates added to the fee schedule. The chart demonstrates the following:

1. Implementation Date: the date the change will be effective.
2. Surgery or Service Description: the detailed description of the procedure code for the service.
3. Procedure Code: the procedure code that will be added to the fee schedule.
4. MHD Reimbursement: the rate at which the MHD will reimburse the provider for the service.
5. MHD Reimbursement Methodology: the manner in which MHD determined the rate.
6. Medicare Reimbursement: comparisons to Medicare's reimbursement, when applicable.

MO HealthNet Division Fee Schedule for Outpatient Surgical Procedures

Implementation Date	Surgery/Service Description	Procedure Code	MHD Reimbursement	MHD Methodology	Medicare Reimbursement
01/01/2019	Biopsy, vertebral body, open; lumbar or cervical	20251	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$5,606.03
01/01/2019	Percutaneous vertebral augmentation, including cavity creation (fracture reduction and bone biopsy included when performed) using mechanical device (e.g., kyphoplasty), 1 vertebral body, unilateral or bilateral cannulation, inclusive of all imaging guidance; lumbar	22514	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$5,606.03
01/01/2019	Arthrodesis, anterior interbody, including disc space preparation, discectomy, osteophytectomy and decompression of spinal cord and/or nerve roots; cervical below C2	22551	\$10,122.22	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$10,122.22
01/01/2019	Arthrodesis, anterior interbody technique, including minimal discectomy to prepare interspace (other than for decompression); lumbar	22558	\$15,369.94	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient Medicare covers similar procedures at \$15,369.94
01/01/2019	Arthrodesis, posterior or posterolateral technique, single level; lumbar (with lateral transverse technique, when performed)	22612	\$10,122.22	Rate based on Medicare; comparable to average in-state reimbursement; includes when multiple procedures billed	\$10,122.22

01/01/2019	Arthrodesis, posterior interbody technique, including laminectomy and/or discectomy to prepare interspace (other than for decompression), single interspace; lumbar	22630	\$15,369.94	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient Medicare covers similar procedures at \$15,369.94
01/01/2019	Arthrodesis, combined posterior or posterolateral technique with posterior interbody technique including laminectomy and/or discectomy sufficient to prepare interspace (other than for decompression), single interspace and segment; lumbar	22633	\$15,369.94	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient Medicare covers similar procedures at \$15,369.94
01/01/2019	Reinsertion of spinal fixation device	22849	\$15,369.94	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient Medicare covers similar procedures at \$15,369.94
01/01/2019	Total disc arthroplasty (artificial disc), anterior approach, including discectomy with end plate preparation (includes osteophyctomy for nerve root or spinal cord decompression and microdissection); single interspace, cervical	22856	\$15,369.94	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$15,369.94
01/01/2019	Total disc arthroplasty (artificial disc), anterior approach, including discectomy to prepare interspace (other than for decompression), single interspace, lumbar	22857	\$15,369.94	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient Medicare covers similar procedures at \$15,369.94
01/01/2019	Prophylactic treatment (nailing, pinning, plating or wiring) with or without methylmethacrylate; clavicle, proximal humerus	23491	\$10,122.22	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$10,122.22

01/01/2019	Arthroplasty, acetabular and proximal femoral prosthetic replacement (total hip arthroplasty), with or without autograft or allograft	27130	\$10,122.22	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient Medicare covers similar procedures at \$10,122.22
01/01/2019	Arthroplasty, knee, condyle and plateau; medial and lateral compartments with or without patella resurfacing (total knee arthroplasty)	27447	\$10,122.22	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$10,122.22
01/01/2019	Capsulotomy; metatarsophalangeal joint, with or without tenorrhaphy, each joint (separate procedure)	28270	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	Medicare covers similar procedures at \$5606.03
01/01/2019	Arthroscopy, shoulder, surgical debridement, extensive	29823	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	Medicare covers similar procedures at \$5606.03
01/01/2019	Arthroscopy, shoulder, surgical; distal claviclelectomy including distal articular surface (Mumford procedure)	29824	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	Medicare covers similar procedures at \$5606.03
01/01/2019	Arthroscopy rotator cuff repair	29827	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$5,606.03

01/01/2019	Arthroscopy, knee, surgical debridement/shaving of articular cartilage (chondroplasty)	29877	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	Medicare covers similar procedures at \$5606.03
01/01/2019	Arthroscopy, knee, surgical abrasion arthroplasty (includes chondroplasty where necessary) or multiple drilling or microfracture	29879	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	Medicare covers similar procedures at \$5606.03
01/01/2019	Arthroscopy, hip, surgical; with femoroplasty (i.e., treatment of cam lesion)	29914	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$5,606.03
01/01/2019	Arthroscopy, hip, surgical; with acetabuloplasty (i.e. treatment of pincer lesion)	29915	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$5,606.03
01/01/2019	Laparoscopy, surgical, repair of paraesophageal hernia, includes fundoplasty, when performed: without implantation of mesh	43281	\$7,594.89	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$7,594.89
01/01/2019	Laparoscopy, surgical, gastric restrictive procedure; with gastric bypass and Roux-en-Y gastroenterostomy (roux limb 150 cm or less)	43644	\$13,500.00	Rate based on the highest in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient Not comparable to Medicare Rate

01/01/2019	Laparoscopy, surgical, gastric restrictive procedure; with gastric bypass and small intestine reconstruction to limit absorption	43645	\$13,500.00	Rate based on the highest in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient Not comparable to Medicare Rate
01/01/2019	Laparoscopy, surgical, gastric restrictive procedure; placement of adjustable restrictive device (eg, gastric band gastric band and subcutaneous port components)	43770	\$13,500.00	Rate based on the highest in-state reimbursement and considers multiple procedures billed	\$7,594.89
01/01/2019	Laparoscopy, surgical, gastric restrictive procedure; revision of adjustable gastric restrictive device component only	43771	\$7,000.00	Rate based on the highest in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient. Not comparable to Medicare Rate
01/01/2019	Laparoscopy, surgical, gastric restrictive procedure; removal of adjustable gastric restrictive device component only	43772	\$7,000.00	Rate based on the highest in-state reimbursement and considers multiple procedures billed	\$2,743.26
01/01/2019	Laparoscopy, surgical, gastric restrictive procedure; removal and replacement of adjustable gastric restrictive device component only	43773	\$13,500.00	Rate based on the highest in-state reimbursement and considers multiple procedures billed	\$4,488.37
01/01/2019	Laparoscopy, surgical, gastric restrictive procedure; removal of adjustable gastric restrictive device and subcutaneous port components	43774	\$7,000.00	Rate based on the highest in-state reimbursement and considers multiple procedures billed	\$2,743.26
01/01/2019	Laparoscopy, surgical, gastric restrictive procedure; longitudinal gastrectomy (ie, sleeve gastrectomy)	43775	\$13,500.00	Rate based on the highest in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient Not comparable to Medicare Rate
01/01/2019	Gastric restrictive procedure with partial gastrectomy, pylorus-preserving duodenoileostomy and ileoileostomy (50 to 100 cm common channel) to limit absorption (biliopancreatic diversion with duodenal switch)	43845	\$13,500.00	Rate based on the highest in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient Not comparable to Medicare Rate

01/01/2019	Gastric restrictive procedure, with gastric bypass for morbid obesity; with short limb (150 cm or less) Roux-en-Y gastroenterostomy	43846	\$13,500.00	Rate based on the highest in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient Not comparable to Medicare Rate
01/01/2019	Gastric restrictive procedure, with gastric bypass for morbid obesity; with small intestine reconstruction to limit absorption	43847	\$14,000.00	Rate based on the highest in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient. Not comparable to Medicare Rate
01/01/2019	Revision, open, of gastric restrictive procedure for morbid obesity, other than adjustable gastric restrictive device (separate procedure)	43848	\$14,000.00	Rate based on the highest in-state reimbursement and considers multiple procedures billed	Only Covered as Inpatient Not comparable to Medicare Rate
01/01/2019	Laparoscopy, surgical; cholecystectomy	47562	\$4,488.37	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$4,488.37
01/01/2019	Laparoscopy, surgical; repair, ventral, umbilical, Spigelian or epigastric hernia (includes mesh insertion, when preformed); reducible incarcerated or strangulated	49653	\$4,488.37	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$4,488.37
01/01/2019	Laparoscopy, surgical, repair incisional hernia (includes mesh insertion, when performed); reducible	49654	\$7,600.00	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$7,600.00
01/01/2019	Endoscopic decompression of spinal cord, nerve root(s), including laminotomy, partial facetectomy, foraminotomy, discectomy and/or excision of herniated intervertebral disc, 1 interspace, lumbar	62380	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$5,606.03

01/01/2019	Laminectomy with exploration and/or decompression of spinal cord and/or cauda equine, without facetectomy, foraminotomy or discectomy (e.g. spinal stenosis), 1 or 2 vertebral segments; cervical	63001	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$5,606.03
01/01/2019	Laminectomy with exploration and/or decompression of spinal cord and/or cauda equine, without facetectomy, foraminotomy or discectomy (e.g. spinal stenosis), more than 2 vertebral segments; cervical	63015	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$5,606.03
01/01/2019	Laminectomy (hemilaminectomy) with decompression of nerve root(s), including partial facetectomy, foraminotomy and/or excision of herniated intervertebral disc; 1 interspace, cervical	63020	\$5,606.03	Rate based on Medicare; comparable to the average in-state reimbursement; includes when multiple procedures billed	\$5,606.03
01/01/2019	Laminectomy (hemilaminectomy) with decompression of nerve root(s), including partial facetectomy, foraminotomy and/or excision of herniated intervertebral disc; 1 interspace, lumbar	63030	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$5,606.03
01/01/2019	Laminectomy (hemilaminectomy) with decompression of nerve root(s), including partial facetectomy, foraminotomy and/or excision of herniated intervertebral disc, reexploration, single interspace; lumbar	63042	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$5,606.03
01/01/2019	Laminectomy, facetectomy and foraminotomy (unilateral or bilateral with decompression of spinal cord, cauda equine and/or nerve root[s], [e.g., spinal or lateral recess stenosis]) including partial and/or excision of herniated intervertebral disc; 1 interspace, cervical	63045	\$5,606.03	Rate based on Medicare, which is comparable to the average in-state reimbursement and considers multiple procedures billed	\$5,606.03

The Network Access Reports demonstrate that in 2019, there are a total of 115 Missouri hospital providers enrolled as MO HealthNet providers providing outpatient services, as compared to 155 in 2017. The 2017 and 2018 analysis included the providers located in bordering states. In 2017, there were 354 hospital providers, and in 2018, there were 354 hospital providers in bordering states providing outpatient services.

NOTE: The 2019 data is strictly based on Missouri hospital providers who are actively submitting Medicaid claims and does not include out of state hospital providers. This methodology was used to more accurately analyze access to care within the state of Missouri.

The MHD does not anticipate any negative impact on access from the change in reimbursement methodology for hospitals providing outpatient services due to the large number of available providers. The decline seen between 2017 and 2019 of the number of Missouri outpatient hospital providers is not necessarily due to rate adjustments, but rather the MHD improving its methodology to more clearly identify the specific provider types which are deemed to be outpatient hospitals. Previously, provider types that were not clearly outpatient hospitals were included in the analysis. Those have now been removed. Access to outpatient agencies for outpatient services is adequate based on the number of available MO HealthNet providers. The MHD will continue to monitor provider enrollment data per county area and the participant enrollment per county area, ratio, and distance standards to ensure adequate access to outpatient hospitals remains stable.

Outpatient Surgical Procedure Comparison to Medicare Reimbursement

Some of the MO HealthNet outpatient surgical procedure codes reimbursement rates are not comparable to Medicare's reimbursement due to Medicare covering many of these procedures as an inpatient service only. The MHD is unable to directly compare its rates to the Medicare rates because the Medicare payment methodology is based on the Outpatient Prospective Payment system, which is the Ambulatory Payment Classification (APC) reimbursement methodology. When applicable, the MHD uses the Medicare rates to help determine the MHD rates to remain comparable to the Medicare rate. When a Medicare rate was available, the MHD utilized that rate to determine the MHD reimbursement rate; therefore, making the MHD rate comparable to the Medicare rate. When a Medicare rate was not available, the MHD would determine the rate by the highest MO HealthNet in-state reimbursement.

Outpatient Radiology Reimbursement Reduction

Effective January 1, 2019, the MHD reduced reimbursement rates for the technical component of the hospitals providing radiology procedures from 125% of the Medicare rate to 90% of the 2018 Medicare Physician fee schedule rate. The rate change only affects hospitals billing the technical component for radiology services and does not affect the physician or professional component reimbursement.

The Network Access Report for radiology services is demonstrated in the outpatient hospitals Network Access Reports.

The MHD does not anticipate any negative impact on access from the change in reimbursement for radiology services due to the large number of available providers. Access to radiology services is adequate based on the available MO HealthNet hospital providers performing radiology services. The

MHD will continue to monitor the provider enrollment data per county area. The MHD will monitor participant enrollment per county area, ratio, and distance standards to ensure adequate access to radiology services in the outpatient hospital setting.

Telehealth Services

Telehealth Services are medical services provided through advanced telecommunications technology from one location to another. Medical information is exchanged in real-time communication from an originating site, where the participant is located, to a distant site, where the provider is located, allowing them to interact as if they are having a face-to-face session. The participant must be able to see and interact with the off-site provider at the time services are provided via Telehealth. Telehealth offers participants, particularly those in rural areas of the state, access to health care services without having to travel extensive miles for an appointment.

Telehealth services are only covered if medically necessary. All MO HealthNet covered services can be rendered through Telehealth at the distant site if providers can ensure services are rendered meeting the standard of care that would otherwise be expected should such services be provided in person.

Health care providers utilizing Telehealth at either an originating site or a distant site must be licensed in Missouri and enrolled as a MO HealthNet provider prior to rendering services. All enrolled MO HealthNet providers are eligible to receive payment for Telehealth services.

Telehealth Reimbursement Methodology

Effective January 1, 2019, the telehealth originating site fee is reimbursed up to the maximum allowable outpatient fee schedule amount of \$15.60 for procedure code Q3014 (or the lesser of billed charges). The health professional receives reimbursement for services rendered according to the fee schedule.

The MHD currently reimburses the telehealth originating site fee in the outpatient hospital as a percentage of the hospital's billed charges. The prospective outpatient payment percentage for in-state hospitals is currently calculated using the Medicaid overall outpatient cost-to-charge ratio from the fourth, fifth, and sixth prior base year cost reports regressed to the current SFY. As part of the regression analysis, a hospital's outpatient payment percentage is limited to a downward adjustment of 15% from the previous year with no limit on the upward swing, unless the hospital chose the lower upward and downward swing option of 6%. Once a hospital has chosen an option, it shall be fixed and applied beginning with the year selected. If a hospital has not chosen an option, the default is the downward adjustment of 15%, from the previous year with no limit on the upward swing. The prospective outpatient payment percentage shall not exceed 100%, and shall not be less than 20%. Outpatient cost-to-charge ratios will be as determined in the desk review of the base year cost reports. Costs and charges for services not reimbursed as a percentage of billed charges shall be excluded when calculating the outpatient cost-to-charge ratios used to determine outpatient percentage rates.

The prospective outpatient payment percentage for out-of-state hospitals is calculated by taking each in-state provider's prospective outpatient payment percentage multiplied by the hospital specific charges for the second prior calendar year to determine the estimated payments by hospital. Then the total estimated payments are divided by the total trended charges to determine the weighted average

percentage. The out-of-state hospitals receive the weighted average percentage unless the hospital has requested to have their prospective outpatient payment percentage calculated based on cost report data in the same manner as the in-state hospitals. The prospective outpatient payment percentage for SFY 2019 for the out-of-state hospitals is 27%.

Outpatient Hospital Fee Schedule

The Outpatient Hospital Fee Schedule for the Outpatient Surgical Procedure Rates is listed with the Laboratory and Radiology fee schedules available at: <https://dss.mo.gov/mhd/providers/fee-for-service-providers.htm>, under Fee Schedules & Rate Lists.

DRAFT

FFS Network Access Report

The data sources for each program are shown below. When reviewing each program for network adequacy, the following data sources and descriptions apply for the 2016, 2017, and 2019 (where updated) population.

Data Sources

- Statewide Medicaid Population – per member data from the State’s Cognos system
- Statewide Medicaid Provider files – per provider data from the State’s Cognos system
- Data Analysis was performed using Optum’s Geo Networks software

Description

The FFS Network Access Reports include the following programs:

1. Primary Care Services, including Primary Care Physicians, Federally Qualified Health Centers, Rural Health Clinics (Independent and Provider Based) and Dental Providers
2. Physician Specialty Services, including Cardiology, Neurology, Ophthalmology, Urology/Nephrology, and Radiology
3. Behavioral Health Services, including Licensed Clinical Social Workers/Licensed Master Social Worker, Psychology, Licensed Professional Counselor/Provisional Licensed Professional Counselor, Psychiatry, Community Mental Health Centers and Substance Use Treatment facilities
4. Obstetrics and Gynecology providers and Labor and Delivery facilities
5. Home Health Agencies
6. Private Duty Nursing.

The reports are divided into categories containing the following columns:

- County – Names of all Missouri Counties and St. Louis City
- Total Population – Number of residents per county
- Eligibles – MO HealthNet population, Medicaid participants per county
- % Medicaid – Percentage of county population that are Medicaid participants
- County Type: Urban, Basic, Rural – County classifications based on total population.
- Providers – Total number of available Medicaid Providers per county
- Ratio – Medicaid Participant to Medicaid Provider Ratio
- Distance Columns– Percentage of Medicaid participants with “provider type” within “x” miles. This is not limited by county, if there are 0 providers in particular county, members may still have an available provider within the distance standard in a nearby county.

When appropriate, distance standards were applied consistent with 20 CSR 400-7.095, which are used for MO HealthNet’s Managed Care plans. The FFS program does not have a distance standard requirement. There are certain services in which it is not applicable to apply distance standards due to the services being performed in the home or the location of the provider is not relevant to the participant traveling to such location. The services in which the participant would not necessarily travel to access services include:

- Home health services

- Private Duty Nursing services
- Laboratory or Radiology services

NOTE: In 2018, Home health services, Private Duty Nursing services, Radiology services, Nursing Facilities, and Outpatient Hospitals were the only services that experienced a revised network analysis. This was due to potential rate adjustments that were explored. MHD has included that data with its submission.

The FFS adequacy data for 2019 was updated to demonstrate the population eligible for services. In prior years, the population utilized was the total MO HealthNet (Medicaid) population per county. It did not accurately demonstrate those FFS participants who could be eligible for the services being analyzed. This data more appropriately exhibits the actual MO HealthNet population that could request services based on their category of assistance, and provides a more precise analysis of access to services.

FFS Network Adequacy - Primary Care Services (Primary Care Providers)-2016

Fee-for-Service Utilization Review

The MHD performed a utilization review of FFS participants accessing provider services by county type (urban, basic and rural) in Missouri during CY2015 and CY2016 for the initial AMRP. Due to rate adjustments in 2018, a second utilization review was conducted based on CY2018 data. The MHD has now conducted a revised utilization review for the latest ARMP. A utilization review was not required for CY2017.

Areas of review include:

1. Primary Care Services, including Primary Care Physicians, Federally Qualified Health Centers, Rural Health Center (Independent and Provider Based) and Dental Providers
2. Physician Specialty Services, including Cardiology, Neurology, Ophthalmology, Urology/Nephrology, and Radiology
3. Behavioral Health Services, including Licensed Clinical Social Workers/Licensed Master Social Worker, Psychology, Licensed Professional Counselor/Provisional Licensed Professional Counselor, Psychiatry, Community Mental Health Centers and Substance Use Treatment facilities
4. Obstetrics and Gynecology providers and Labor and Delivery facilities
5. Home Health Agencies
6. Private Duty Nursing

No provider specialties were omitted for provider types of MD, DO, Nurse Practitioners and Physician Assistants.

Medical, outpatient and dental claim types were reviewed for the measure of utilization of services. Provider specialties were reviewed at the billing and performing levels and prioritized as follows (in other words, if someone has two specialties such as psychiatry and primary care they are placed in the psychiatry group):

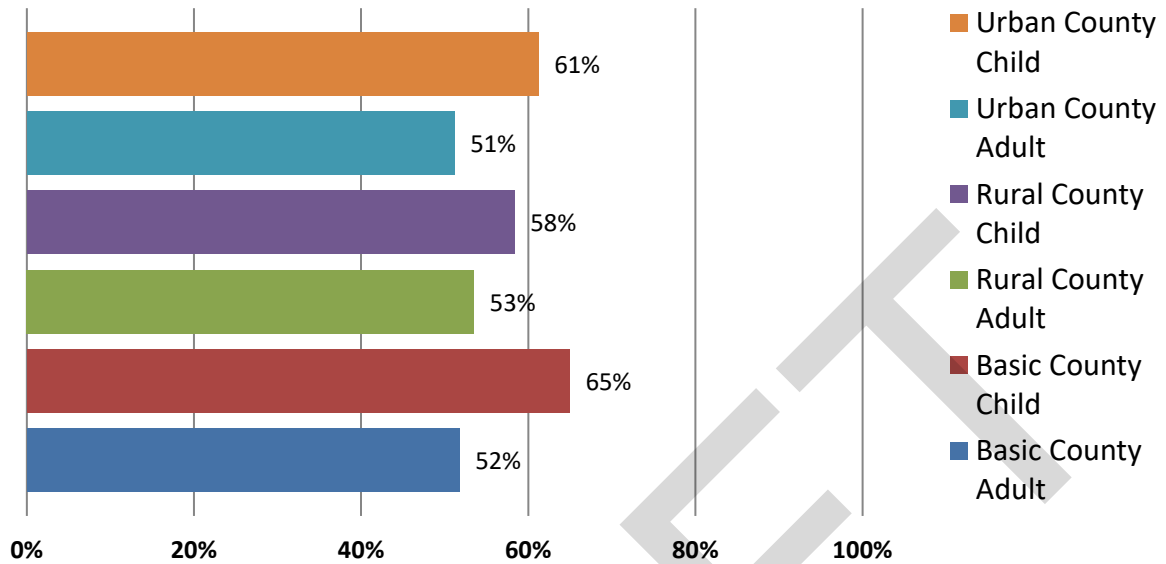

- Psychiatry
- OB/GYN
- Primary Care
- Cardiology
- Neurology
- Ophthalmology
- Urology/Nephrology
- Radiology

Clinics were queried to look at appropriate billing provider specialties when there was no performing provider present on the claim.

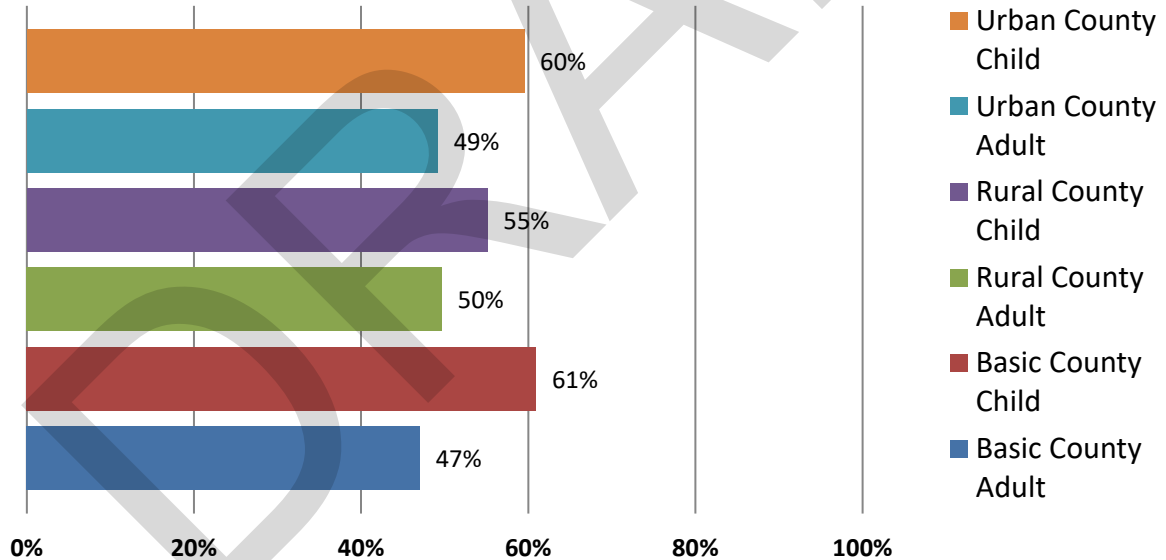

Gateway, inpatient, NEMT, ambulance, Managed Care, Medicare crossover, hospice, and nursing home claims are not included in this analysis.

The following charts reflect the number of participants with at least one claim by provider type during the measurement year. Child is defined as ages 0-20 and adult as ages 21 and older.

FFS Network Access Report – Pharmacy Agencies

When reviewing pharmacy agencies for network adequacy, the following data sources and descriptions apply for the 2019 population.

Data Sources

- Statewide Medicaid Population – per member data from the State’s Cognos system
- Statewide Medicaid Provider files – per provider data from the State’s Cognos system

Description

This report is divided into categories containing the following columns:

- County – Names of all Missouri Counties and St. Louis City
- Total Population – Number of residents per county
- Eligibles- MO HealthNet Population, Medicaid participants per county
- % Medicaid – Percentage of county population that are Medicaid participants
- County Type Urban, Basic, Rural – County classifications based on total population.
- Providers – Total number of available Medicaid Providers per county
- Ratio – Medicaid Participant to Medicaid Provider Ratio
- Distance Columns – Percentage of Medicaid participants with “provider type” within “x” miles. This is not limited by county, if there are 0 providers in particular county, members may still have an available provider within the distance standard in a nearby county.

Distance standards were applied consistent with 20 CSR 400-7.095 for pharmacy, which are used for MO HealthNet’s Managed Care plans. The three distance columns on the report indicate Urban (closest), Basic (middle), and Rural (furthest). The FFS program does not have a distance standard requirement.

FFS Network Adequacy – Pharmacy Agencies-2019

Fee-for-service Utilization Review – Pharmacy Agencies

The MO HealthNet Division (MHD) performed a utilization review of Fee-for-Service (FFS) participants accessing pharmacy services by county type (urban, basic and rural) in Missouri during CY2018. No provider specialties were omitted for pharmacy services.

Areas of review include:

- Pharmacy agencies.

The following chart indicates the number of participants with at least one pharmacy claim during calendar year 2018.

FFS Network Access Report – Nursing Facilities

Data Sources

- Statewide Medicaid Population – per member data from the State’s Cognos system
- Statewide Medicaid Provider files – per provider data from the State’s Cognos system
- Statewide Data Analysis was performed using Optum’s Geo Networks software

Description of Data

This report is divided into categories containing the following columns:

- County – Names of all Missouri Counties and St. Louis City
- Total Population – Number of residents per county
- Eligibles or MO HealthNet Population – Total Medicaid participants per county
- % Medicaid – Percentage of county population that are Medicaid participants
- County Type Urban, Basic, Rural – County classifications based on total population
- Providers – Total number of available Medicaid Providers per county
- Ratio – Medicaid Participant to Medicaid Provider Ratio
- Distance Columns 1, 2, 3 – Percentage of Medicaid participants with “provider type” within “x” miles. This is not limited by county, if there are 0 providers in particular county, members may still have an available provider within the distance standard in a nearby county

Distance standards were applied consistent with 20 CSR 400-7.095 which are used for MO HealthNet’s Managed Care plans. The three distance columns on the report indicate Urban (closest), Basic (middle), and Rural (furthest). The FFS population does not have required distance standards to compare to the Managed Care and Commercial insurance plans.

NOTE: In the 2017 data, the entire FFS population was analyzed for network access. In 2018, data was used to include the entire Medicaid (Managed Care and FFS) population to analyze network access. In an effort to improve the methodology to analyze only the FFS population, the 2019 data only includes those that are designated as FFS and are eligible for NF services based on the category of assistance. These numbers do include the current MO HealthNet population who is currently receiving NF services. This data more appropriately exhibits the actual MO HealthNet population that could request NF services. This provides a more precise analysis of access to NF services.

Year	FFS Participants	Current MO HealthNet NF Residents
2018	222,474	25,488
2019	54,209	25,411

Nursing Facility Utilization Data

Utilization charts on the following pages display MHD's review of FFS participants residing in NFs. The source of this data is the Certificate of Need (CON) Survey from the DHSS. The **April-June 2017** utilization data demonstrates the occupancy by county, and each county shows whether it is urban, basic or rural, during the second quarter of 2017, before the rate change took effect.

The MHD has updated utilization data with the **October-December 2017 and January – March 2019** CON Survey's from the DHSS, after the rate change took effect in December 2017. Updates included all NFs, Medicaid NFs, and the total licensed and certified beds. The April-June 2017 data only included Medicaid NFs and only demonstrated what the NFs self-reported as available beds, which are not based on the DHSS report of Certified Facilities showing licensed beds, certified beds, Medicare beds, Medicaid beds, and Dual Certified Medicare/Medicaid beds. According to DHSS, the Medicaid certified beds and Dual Certified Medicare/Medicaid beds represent the beds that are available for use by MO HealthNet residents.

The below chart displays the number of available Nursing Facilities in Missouri, Medicaid enrolled facilities and non-Medicaid nursing facilities. This represents at least a 93% participation rate in MO HealthNet for NFs.

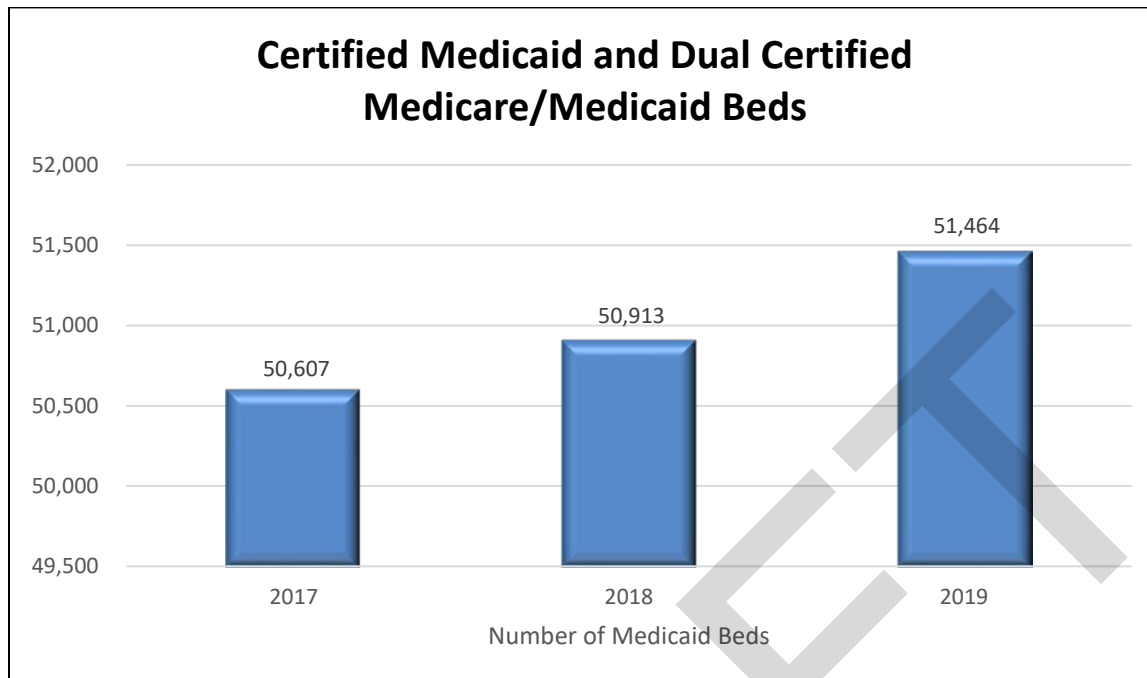

The January – March 2019 data demonstrates that Medicaid facilities have an occupancy rate of 69.06% for total available beds, and a 69.36% occupancy rate for available Medicaid beds, showing that more than 30.64% of the beds are vacant and available for use by Medicaid residents. Of all residents in Medicaid beds, 71.48% have Medicaid as the payer. Therefore, Medicaid is a significant funding resource for the NFs. The MHD considers access to NF adequate due to the large number of facilities enrolled in the MO HealthNet program and the total number of vacant Medicaid beds available.

According to the DHSS, the licensed beds represent the beds that are available for use by the general population. The DHSS considers the number of Medicaid certified and dual Medicare/Medicaid certified beds as being the number of beds available for use by a Medicaid resident and does not consider available beds to be different from certified beds. The DHSS considers the number of licensed beds as being the number of beds available for use by the general population and does not consider available beds to be different from licensed beds. If a NF reports a different number of available beds, they may not be including all their licensed and certified beds because the NF may temporarily utilize a room/bed for other purposes. The NF may temporarily use the room for another purpose only if it can be available for resident use within 24 hours. If the room/bed is not available for use within 24 hours, the NF may be required to delicense and decertify the bed. The table includes the total licensed and certified beds and the occupancy in all NFs and Medicaid facilities to demonstrate a more relevant comparison of NF beds for MO HealthNet participants as compared to the general population.

As set forth in the 2019 FFS Network Adequacy data, there are a total of 54,209 MO HealthNet participants who could be eligible for MO HealthNet to reimburse for NF services, if the criteria for NF services were met. According to the January – March 2019 CON survey, there are 25,411 MO HealthNet residents receiving NF services. Those current MO HealthNet participants are in the Blind Program and Traditional Medicaid categories of assistance.

Access Comparison to General Population

The January – March 2019 utilization data demonstrates that 30.79% of the total beds are vacant and available to be occupied by the general population and 30.64% of the total Medicaid beds are vacant and available to be occupied by the MO HealthNet participants. The general population appears to have marginally more access than that of the Medicaid population but the difference is insignificant. It is particularly salient to note that the general population may be admitted into a Medicaid or non-Medicaid bed. The MO HealthNet population cannot be admitted into a non-Medicaid bed and can only be a resident in a Medicaid certified bed or dual Medicare/Medicaid certified bed. The NF utilization data demonstrates that the Medicaid population has equal access to NF services as compared to the general population.

The MHD does not believe it is likely that the NFs will reduce the number of Medicaid participants they accept, or withdraw from the Medicaid program, due to the large percentage of reimbursement from Medicaid. Of all residents in Medicaid beds, 71.48% have Medicaid as the payer. Therefore, Medicaid is a significant funding resource for the NFs.

The MHD has not seen any negative impact on NF access. Historical data is comparable to the current data presented above showing that the MHD has had a strong NF program for many years. Access to NF care is adequate based on the number of available Medicaid NFs and Medicaid beds. NFs were operating at a lower Medicaid reimbursement 2 years ago, with the Medicaid program being a major contributor to the facilities' resources, MO HealthNet does not expect NFs closing or withdrawing from the Medicaid program.

Utilization for Nursing Facilities MO HealthNet (Medicaid) Enrolled Facilities April-June 2017

FFS Network Access Report – Outpatient Hospital Services

When reviewing the outpatient hospital services program for network adequacy, the following data sources and descriptions apply for the 2017, 2018, and 2019 population. Beginning with the 2019 data, out of state hospitals are no longer included in the Missouri FFS AMRP.

Data Sources

- Statewide Medicaid Population – per member data from the State’s Cognos system
- Statewide Medicaid Provider files – per provider data from the State’s Cognos system

Description

This report is divided into categories containing the following columns:

- County – Names of all Missouri Counties and St. Louis City
- Total Population – Number of residents per county
- Eligibles- MO HealthNet Population, Medicaid participants per county
- % Medicaid – Percentage of county population that are Medicaid participants
- County Type Urban, Basic, Rural – County classifications based on total population.
- Providers – Total number of available Medicaid Providers per county
- Ratio – Medicaid Participant to Medicaid Provider Ratio
- Distance Columns – Percentage of Medicaid participants with “provider type” within “x” miles. This is not limited by county, if there are 0 providers in particular county, members may still have an available provider within the distance standard in a nearby county.

When appropriate, distance standards were applied consistent with 20 CSR 400-7.095, which are used for MO HealthNet’s Managed Care plans. The three distance columns on the report indicate Urban (closest), Basic (middle), and Rural (furthest). The FFS program does not have a distance standard requirement.

FFS Network Adequacy – Outpatient Hospital Services -2017

Fee-for-Service Utilization Review – Outpatient Hospital Services

The MHD performed a utilization review of FFS participants accessing provider services by county type (urban, basic, and rural) in Missouri during CY2016 and CY2018.

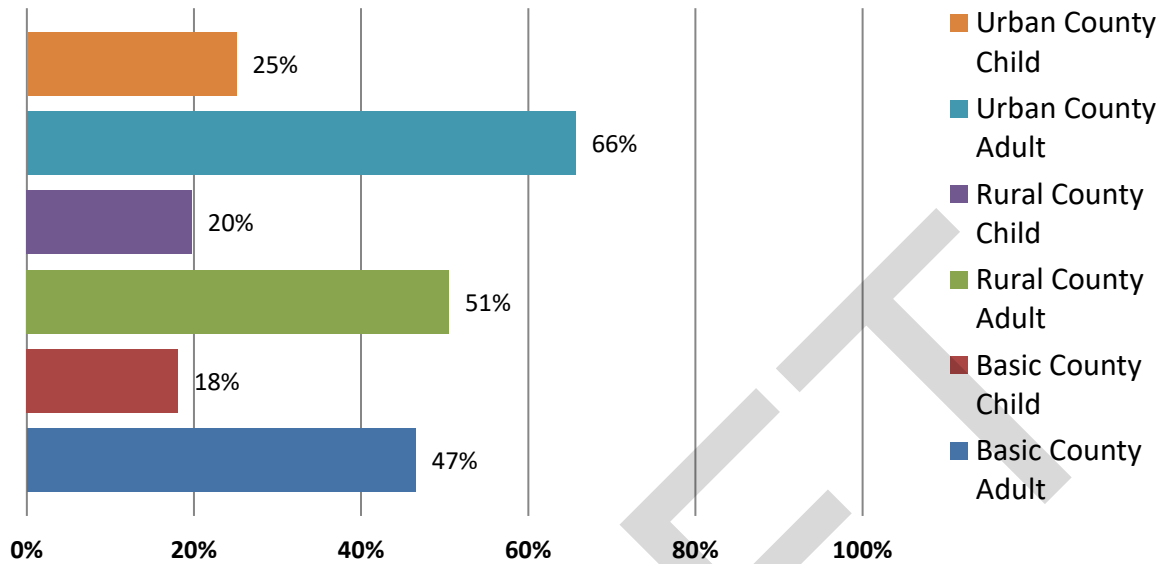

Areas of review include:

1. Outpatient services, including those by an outpatient hospital.
2. Outpatient surgical services, including those provided by an outpatient hospital.
 - a. The outpatient surgical procedure codes were the only codes included for the utilization review.
3. Telehealth services, including those provided by an outpatient hospital.
 - a. The utilization for outpatient services included all services received in the outpatient hospital.
4. Radiology services performed in the outpatient hospitals.
 - a. Only the outpatient hospitals billing the radiology technical component.

The following charts reflect the number of participants with at least one claim by provider type during the measurement year. Child is defined as ages 0-20 and adult as ages 21 and older.

CY2018 Utilization Rates for Outpatient Hospital
