## **METHODOLOGY**

### **The Purpose**

The United States Department of Health and Human Services requires state agencies that administer Childcare Block Grant Funds to collect information on childcare market rates. To meet this requirement, the Research and Evaluation Unit of the Missouri Department of Social Services, on behalf of the Children's Division (CD), Early Childhood and Prevention Services Section (ECPS), conducts a survey biannually that contains information about rates, as well as subsidized payment issues and other statistics.

### **The Sample**

The Missouri Department of Health and Senior Services, which is responsible for licensing childcare facilities, provided a list of all licensed facilities. Surveys were mailed to all 3,552 licensed providers. A total of 1,098 questionnaires were completed either online or by paper, for a return rate of 30.91%.

### **The Survey**

The survey sent to the childcare providers covered the following topics:

- rates charged for care differentiated by age groups (Infant, Pre School, and School Age<sup>1</sup>), type of facility (Family, Group or Center), category of care (full-time, half-time, or part-time<sup>2</sup>), and whether care was provided during daytime/weekday hours or evening/weekend hours;
- the number of children cared for in each age group, type of facility, and category;
- whether or not the provider is accredited;
- whether or not the provider accepts state subsidy payments;
- employees and their salaries; and
- performance of the Department of Social Services with respect to prompt and accurate payment for children receiving state subsidy.

### **Data Cleansing**

Providers were asked to report rates as charged hourly, daily, weekly, biweekly, or monthly. These reported rates were then converted to daily rates by multiplying hourly rates by 7.5, dividing weekly rates by five, bi-weekly rates by 10 and monthly rates by 22. Rates derived in this manner were checked for reasonableness in light of the type of care provided and the area of the state in which the care was provided.

---

<sup>1</sup> Infant is defined as under 2 years old; Pre School is 2 to 5 years old; and School Age is 5 years and older.

<sup>2</sup> Full-day is 5 or more hours; half-day is 3 to 5 hours; and part-day is less than 3 hours.

## **Determining Market Rates**

Surveys returned with no rate for a given category of care had no influence on calculating rate information for that type of care. Because of this, the total number of surveys for each type of care and classification varies depending on the number of providers that reported a rate for that type of care.

Caution should be used in interpreting results where there are few responses in a given geographical area or for a certain type of care. This is especially true with respect to Group Homes. Also, keep in mind that voluntary participation introduces the potential for self-selection bias. With respect to this particular survey, providers charging more than DSS rates may have a perceived incentive to return the survey in the hope of influencing state paid rates. Providers charging below or close to the DSS rates may be more satisfied and, therefore, have less incentive to respond. In addition, only licensed providers were surveyed. It is uncertain how the inclusion of unlicensed providers may have affected the results.
